The Basics of Chemical Reactions Krista West, 2013-12-15 The chemical reactions that shape the world are sometimes simple and sometimes complex, which is at the very core of this informative text. This volume explores the simplicity of basic chemical reactions and then builds to the more complex, giving readers a history of the years and the minds that contributed to the research that led to chemistry as we know it today. Biographical sidebars provide unique information about scientists who are valued in the field but are often not widely known.

The Basics of Biochemistry Kyle Kirkland, 2013-12-15 Biochemistry or the study of the chemical processes that occur within living things has been researched for hundreds of years by a number of great scientific minds. This comprehensive volume not only explores the history and study of biochemistry and how it stands today but also the many scientists who devoted their lives and careers to the field. It includes charts, photos, diagrams, and informative sidebars that help create an accessible text that can be used for research or an entertaining read.

Education in Haiti Mercer Cook, 1948 The Student, 1884 *Make Science Fun: Experiments* Jacob Strickling, 2017-11-06

Make Science Fun 2 is intended for an older, more serious age group of 8-15. It is designed for children to do actual science experiments, not just science activities at home. Most science experiment books aren't experiment books at all. They mostly contain fun science activities which are fun to do, help learn science, but a fun science activity isn't always an experiment. A science experiment sets out to answer a question or solve a problem using a fair and controlled test. To count as a science experiment, you need to take measurements, make observations, and control variables. With space to write hypotheses, record results, make observations, and draw graphs required, *Make Science Experiments* is a strong foundation on which to build student awareness of the importance of science in everyday lives.

SELLING POINTS Science experiments for the kitchen, garage, or workshop, bathroom, and garden. Bonus projects perfect for a science fair or school project. Projects using only basic products that can be found in every home kitchen or bathroom. *Make Science Fun* banishes the science is boring stereotype through fun experiments that children can do alone or with friends or parents.
