Google Maps Act Practice Today:

Time for mapping Sybille Lammes, Chris Perkins, Alex Gekker, Sam Hind, Clancy Wilmott, Daniel Evans, 2018-06-29 Maps take place in time as well as representing space The Google map on your smartphone appears to fix the world serving as a practical spatial tool but in practice is deployed in ways that draw attention to memories rhythm synchronicity sequence and duration This interdisciplinary collection focuses on how these temporal aspects of mapping might be understood at a time when mapping technologies have been profoundly changed by digital developments It contrasts different aspects of this temporality bringing together experts from critical cartography media studies and science and technology studies Together the chapters offer a unique interdisciplinary focus revealing the complex and social ways in which time is wrapped up with digital technologies and revealed in everyday mapping tasks from navigating across cities to serving as scientific groundings for news stories from managing smart cities to visual art practice It brings time back into the map An electronic edition of this book is freely available under a Creative Commons CC BY NC ND licence

Location Awareness in the Age of Google Maps Rebecca Noone, 2024-07-12 Location Awareness in the Age of Google Maps explores the mundane act of navigating cities in the age of digital mapping infrastructures Noone follows the frictions routing through Google Maps categorising and classifying of spatial information Complicating the assumption that digital maps distort a sense of direction Noone argues that Google Maps location awareness does more than just organise and orient a representation of space it also organises and orients imaginaries of publicness self-sufficiency legibility and error At the same time Location Awareness in the Age of Google Maps helps to animate the ordinary ways people are challenging and refusing Google Maps vision of the world Drawing on an arts based field study spanning the streets of London New York London Toronto and Amsterdam Noone's encounters of asking for directions open up lines of inquiry and spatial scores that cut through Google's universal mapping project Location Awareness in the Age of Google Maps will be essential reading for information studies and media studies scholars and students with an interest in embodied information practices critical information studies and critical data studies The book will also appeal to an urban studies audience engaged in work on the digital city and the datafication of urban environments

Hamilton Now Melissa Bennett, 2019-04-26 Hamilton Now Subject Object is the stunning exhibition accompanying a two part exhibition at the Art Gallery of Hamilton in 2018 2019 edited by AGH curator Melissa Bennett Hamilton Now comments on the exploding art scene in this burgeoning Ontario city through stunning images from 17 of the city's contemporary artists The work of artists in this two part exhibition explores current cultural issues such as identity and materiality Race issues queer identity family history virtual reality digital interventions and philosophical meanderings are all part of this visually stunning collection of works by mostly under known emerging and established artists

Visual and Linguistic Representations of Places of Origin Maria Pia Pozzato, 2017-12-05 This book is about the representations both visual and linguistic which people give of their own places of origin It examines the drawings of interviewees who were asked

to draw their own place of origin on a white A3 sheet using pencil or colour according to their choice If they were born in a place they did not remember because they moved in when they were very small they could draw the place they did remember as the scenario of their early childhood The drawings are examined from three different perspectives semiotics cognitive psychology and geography The semiotic instruments are used to describe how each person reconstructs a complex image of his her childhood place and how they translate their own memories from one language to another e g from drawing to verbal story trying to approach what they want to express in the best possible way The cognitive psychological point of view helps clarify the emotional world of the interviewees and their motivations during the process of reconstruction and expression of their childhood experiences The geographical conceptualizations concern a cultural level and provide insight into the cartographic models that inspire the maps people drew One of the main findings was the influence from cultural codes as demonstrated in the fact that most of the US students interviewed drew their maps showing considerable cartographic expertise in comparison to their European counterparts **Public Affairs Information Service Bulletin** ,1925
