Scientific and Technical Aerospace Reports, 1985 **Adaptive Finite Elements in Linear and Nonlinear Solid and Structural Mechanics** Erwin Stein, 2007-04-02 This course with 6 lecturers intends to present a systematic survey of recent research results of well known scientists on error controlled adaptive finite element methods in solid and structural mechanics with emphasis to problem dependent concepts for adaptivity error analysis as well as h and p adaptive refinement techniques including meshing and remeshing Challenging applications are of equal importance including elastic and elastoplastic deformations of solids contact problems and thin walled structures Some major topics should be pointed out namely i The growing importance of goal oriented and local error estimates for quantities of interest in comparison with global error estimates based on dual finite element solutions a The importance of the p version of the finite element method in conjunction with parameter dependent hierarchical approximations of the mathematical model for example in boundary layers of elastic plates Hi The choice of problem oriented error measures in suitable norms considering residual averaging and hierarchical error estimates in conjunction with the efficiency of the associated adaptive computations iv The importance of implicit local postprocessing with enhanced test spaces in order to get constant free i.e. absolute not only relative discretization error estimates v The coupling of error controlled adaptive discretizations and the mathematical modeling in related subdomains such as boundary layers The main goals of adaptivity are reliability and efficiency combined with insight and access to controls which are independent of the applied discretization methods By these efforts new paradigms in Computational Mechanics should be realized namely verifications and even validations of engineering models **Finite Element Bibliography** Gerard De Vries, 1976-12 This bibliography had its inception in 1967 when the compilers first attempted a comprehensive coverage of the finite element literature using both manual and computer based retrieval Initially the data base was stored on a card index but this was subsequently transferred to punched cards and magnetic tape Computer processing was adopted at an early stage to derive the three index formats from the data base Over the subsequent years several versions of the bibliography were produced with two of these being made available in a report form to other researchers From the widespread interest in these documents it became evident that there was a need for a commercially available comprehensive bibliography in this area A major effort was undertaken to revise update and extend the data base resulting in this present volume The bibliography covers the period 1956-1975 primarily although some earlier publications of historical interest are included The citations are not restricted to the English language and documents are listed in many languages and from diverse places of origin All publication formats were accepted so that references will be found to books monographs journal papers and articles theses dissertations reports surveys and the like Computational Science — ICCS 2003 Peter M.A. Sloot, David Abramson, Alexander V. integration of computation and science a research field known as computational science Computational science plays a vital role in fundamental advances in biology physics chemistry astronomy and a host of other disciplines This is through the coordination of computation data management access to instrumentation knowledge synthesis and the use of new devices It has an impact on researchers and practitioners in the sciences and beyond The sheer size of many challenges in computational science dictates the use of supercomputing parallel and distributed processing grid based processing advanced visualization and sophisticated algorithms At the dawn of the 21st century the series of International Conferences on Computational Science ICCS was initiated with a first meeting in May 2001 in San Francisco The success of that meeting motivated the organization of the second meeting held in Amsterdam April 21-24 2002 where over 500 participants pushed the research field further The International Conference on Computational Science 2003 ICCS 2003 is the follow up to these earlier conferences ICCS 2003 is unique in that it was a single event held at two different sites almost opposite each other on the globe Melbourne Australia and St Petersburg Russian Federation The conference ran on the same dates at both locations and all the presented work was published in a single set of proceedings which you hold in your hands right now Electrical & Electronics Abstracts ,1997
