Artificial Intelligence in Recruiting. A Literature Review on Artificial Intelligence Technologies, Ethical Implications and the Resulting Chances and Risks Matthias Rudolph, 2021-01-07 Master s Thesis from the year 2020 in the subject Computer Sciences Artificial Intelligence grade 1 3 Friedrich Alexander University Erlangen Nuremberg Wirtschaftsinformatik language English abstract The thesis aims to analyze this field of tension between the benefits and risks caused by the introduction of AI into recruiting based on a systematic analysis of academic publications To the knowledge of the author neither a literature review on ethical challenges

of AI based recruiting tools nor an overview addressing application fields and the resulting ethical risks has been published so far. Consequently, this thesis aims to close this research gap by disclosing how AI technologies affect the recruiting process and how ethical challenges arising from the implementation of AI based tools are addressed in the same publications. Consequently, research questions RQ one, RQ1, and RQ two, RQ2, can be derived: Which AI technologies are applied in the field of recruiting and how do they influence the recruiting process? Which major ethical challenges arise from the introduction of AI into recruiting and how are these challenges addressed by the proposed AI based tools? Addressing these two RQs, the remainder of this thesis is structured as follows: Chapter 2 classifies recruiting and its subprocesses as a part of Human Resources (HR), establishing a common understanding of AI and machine learning (ML) algorithms relevant in AI based recruiting tools and derives major ethical challenges with a focus on the ethical principles of fairness and transparency. In chapter 3, the methodical approach used for identifying and selecting relevant literature is described. Chapter 4 answers both RQs based on the AI based recruiting tools included in the literature set. In turn, the first part of the analysis focuses on analyzing how the needs raised through traditional recruiting means are addressed by AI based recruiting tools, also touching base on the underlying technologies. The second part addresses if and where applicable how these publications incorporate fairness and transparency. Subsequently, chapter 5 discusses the main findings of the analysis of the literature set and provides implications for theory and practice, followed by a brief conclusion and the outlining of limitations and future research fields in chapter 6.

Science and Technology Annual Reference Review ,1990 **American Monthly Review of Reviews** Albert Shaw,1929 **The Impact of Artificial Intelligence on Workforce Management within the Banking and Finance Industry** Sofia Papadopoulou,2021-05-18 Master s Thesis from the year 2020 in the subject Business economics Banking Stock Exchanges Insurance Accounting grade 1 6 University of applied sciences Frankfurt a M language English abstract The purpose and objective of this thesis is to examine the degree of impact WFM is facing due to implementation of AI based tools within the banking and finance industry To do this the author will select and classify under the chapter Literature Review how in which departments and to what degree banks and other financial institutions have implemented AI tools within their organization Secondly the author will conduct interviews with executive leaders as well as with AI researchers and experts and analyze the data received For this

study the author focuses on AI's impact on WFM within the banking and finance industry. The purpose of the following questions is to refine the present knowledge gap within the banking and finance industry regarding the WFM impact of AI. The author will emphasize via a literature review and interviews exactly how AI-based technology tools have been implemented in the banking and finance industry. To do so, three research questions have been chosen and will be further analyzed throughout this study paper. The first question focuses on WFM and HR teams. It predicts how many people and what kind of qualifications will be deployed, as well as where and when they will be deployed. There are many consequences of banks and other financial institutions implementing more AI technology. In his book *Competing in the Age of AI*, Iansiti and Lakhani mention that it is critical for leaders to understand the choice of model along with navigating the ethics of digital scale. The author emphasizes that leaders must be able to build a strong organization of safety, security, and sustainability. Firms spend billions of dollars on new AI-related technologies and innovations. Despite this, banks and other financial institutions face three main issues. The first challenge is an outdated operating model. The second challenge is the lack of a fitting talent strategy. Both challenges are interconnected to each other. Likewise, as a third challenge, Workforce Management (WFM), the core process that boosts performance levels and competency for an organization, has been reformed and disrupted by the introduction of AI. *Pictorial Review*, 1923. Computer Book Review, 1986. **Manufacturing Technology Review**, 1986. *Writing with AI in EFL Classrooms: Students' Perspectives and Pedagogical Implications*. Melanie Razonable, 2026-03-18. Essay from the year 2026 in the subject Didactics for the subject English. Miscellaneous grade 11 language English abstract. The rapid development of Artificial Intelligence (AI) has begun to reshape educational practices across disciplines, including language learning. In English as a Foreign Language (EFL) contexts, AI-assisted writing tools are increasingly used to support learners during different stages of the writing process. These tools provide functions such as idea generation, vocabulary suggestions, grammar feedback, and text modeling, which may help students overcome common difficulties in second language writing. This paper explores students' perspectives on the use of AI-assisted writing tools in EFL classrooms and discusses the pedagogical implications of integrating these technologies into writing instruction. Drawing on existing literature and theoretical frameworks such as the Technology Acceptance Model and the Presage-Process-Product model, the discussion examines how students perceive the usefulness and accessibility of AI tools and how these perceptions influence their engagement with writing tasks. The analysis suggests that EFL learners generally express positive attitudes toward AI writing tools, reporting benefits such as reduced writing anxiety, improved idea development, and increased exposure to vocabulary and grammatical structures. However, the paper also highlights potential concerns, including overreliance on AI, inaccuracies in AI-generated language, and possible limitations for creativity and critical thinking when AI is used without guidance. The paper argues that the effectiveness of AI in writing instruction depends not primarily on the technology itself but on how it is integrated into pedagogical practice.

Thoughtful instructional design and active teacher guidance are essential to ensure that AI functions as a supportive learning tool rather than a substitute for meaningful language learning The study concludes by emphasizing the importance of responsible and reflective integration of AI technologies to support sustainable development in EFL writing education
