What is Gaming Laptop? A gaming computer is a desktop that is often custom built for the purpose of increasing performance in modern computer games. Modern computer games may require an increase in graphical and processing power. Gaming computers have video cards with their own dedicated RAM, processor, and cooling system. A gaming laptop is one used primarily for the purpose of playing computer games. Unlike conventional laptops, they have a higher-end graphics card that is not integrated or designed to conserve battery power. Well, while gaming laptops are more expensive and usually have extra buttons.
