Internet of Things, Artificial Intelligence and Blockchain Technology R.Lakshmana Kumar, Yichuan Wang, T. Poongodi, Agbotiname Lucky Imoize, 2021-09-02 This book explores the concepts and techniques of IoT AI and blockchain. Also discussed is the possibility of applying blockchain for providing security in various domains. The specific highlight of this book is focused on the application of integrated technologies in enhancing data models, better insights and discovery, intelligent predictions, smarter finance, smart retail, global verification, transparent governance, and innovative audit systems. The book allows both practitioners and researchers to share their opinions and recent research in the convergence of these technologies among academicians and industry people. The contributors present their technical evaluation and compare it with existing technologies. Theoretical explanation and experimental case studies related to real-time scenarios are also included. This book pertains to IT professionals, researchers, and academicians working on fourth revolution technologies.

AI in Language Teaching, Learning, and Assessment Pan, Fang, 2024-02-12 The introduction of Artificial Intelligence (AI) has ignited a fervent academic discourse. AI's role is as both a powerful ally and a potential adversary in education. For instance, ChatGPT is a generative AI which mimics human conversation with impressive precision. Its capabilities span the educational spectrum from answering questions and generating essays to composing music and coding. Yet, as with any innovation, its advent has sparked a spirited academic dialogue. *AI in Language Teaching, Learning, and Assessment* seeks to address these concerns with rigor and thoughtfulness. It explores the undeniable drawbacks of AI in language education and offers strategic insights into their prevention. It scrutinizes the resources and safeguards required to ensure the ethical and secure integration of AI in academic settings. This book lays out the multifaceted benefits of incorporating AI into language teaching, learning, and assessment. Its chapters dissect the transformative impact of AI on pedagogy, teaching materials, assessment methodologies, applied linguistics, and the broader landscape of language education development. This book is a valuable resource for language learners, educators, researchers, and scholars alike. It beckons to those who are keen on exploring and implementing AI in education, as well as AI developers and experts seeking to bridge the chasm between technology and language education.

AI*IA 2005: Advances in Artificial Intelligence Sara Manzoni, 2005-10-06 This volume collects the papers selected for presentation at the IX Congress of the Italian Association for Artificial Intelligence (AI*IA) held in Milan at the University of Milano Bicocca, September 21-23, 2005. On the one hand, this congress continues the tradition of AI*IA in organizing its biannual scientific meeting from 1989; on the other hand, this edition is a landmark in the involvement of the international community of artificial intelligence, directly involving a broad number of experts from several countries in the Program Committee. Moreover, the peculiar nature of scientific research in artificial intelligence, which is intrinsically international, and several consolidated international collaborations in projects and mobility programs allowed the collection and selection of papers from many different countries all around the world, enlarging the visibility of the Italian

contribution within this research field Artificial intelligence is today a growing complex set of conceptual theoretical methodological and technological frameworks offering innovative computational solutions in the design and development of computer based systems Within this perspective researchers working in this area must tackle a broad range of knowledge about methods results and solutions coming from different classical areas of this discipline The congress was designed as a forum allowing researchers to present and discuss specialized results as general contributions to AI growth
