Generative and Open AI in Industry 5.0 Sangeeta Sharma, Robin Singh Bhadoria, Mukesh Kumar Giluka, 2026-04-23

This book provides an up to date and easy to read introduction to Generative AI and its revolutionary contribution to building Industry 5.0. Written for both practitioners and interested readers it is a clear and compelling overview of the technologies at the heart of the next industrial revolution. The book introduces the conceptual notions behind generative models, large language models, LLMs and the neural networks that drive them. It delves into the mathematical and conceptual foundations of Generative AI, transformer architecture and the practical applications of language and vision models. Further, the book links the innovations to Industry 5.0, discussing digital twins, predictive maintenance, DevOps and cybersecurity in intelligent systems. It encompasses real world applications of AI in areas such as finance, manufacturing and smart infrastructure. Case studies like the application of generative models in FinTech and blockchain adoption underscore how AI is already transforming business and society around the world. The book is perfect for students, researchers and practitioners of AI, data science and industrial systems interested in comprehending the theory and practical applications of Generative AI. It also benefits educators and policymakers who wish to lead in cutting edge technological advancements with emphasis on responsible, secure and human oriented AI applications for a brighter future.

ChatGPT eBook GURMEET SINGH DANG,

Media Matters: Towards New Safeguards for Their Democratic Functions Erik Schrijvers, Alyt Damstra, Lana

Askari, Koen Hoogendoorn, Catrien Bijleveld, 2026-01-16. This is an Open access Book. In this report the Netherlands Scientific Council for Government Policy (WRR) examines how the changing media system influences Dutch democracy. The ability of the media to fulfil their democratic functions is under threat. Analyses show that there is more information than ever, information that is available anywhere anytime. In this context of abundant supply, journalistic content is squeezed to the margins. Tech and platform companies attract the majority of all digital advertisement revenues, which confronts national media with financial challenges. Local journalism is in dire straits. The public debate has become broader and more dynamic but also more unsafe as journalists, scientists and political actors are regularly confronted with online intimidation and harassment. The WRR recommends new media policies and advises the government: 1 to actively and urgently implement the new EU rules for tech and platform companies; 2 to ensure that content of public interest remains accessible and visible in the online domain; 3 to strengthen local journalism; and 4 to encourage users, including key players such as government and politicians, to acknowledge their own media responsibility in the new media system and operate in line with it.
