Advances in Cement and Concrete Akeem Ayinde Raheem,2025-04-25 The book reports recent research in the production processing analysis and testing of cement and concrete materials Topics include the development of green building materials synthesis and applications of nanoparticles self healing and self sensing cement composites and High Performance Concrete HPC Keywords Wood Ash Nanosilica Rice Husk Ash Bio Fibrous Concrete Hollow Sandcrete Blocks Metakaolin Blended Cement Mortar Pozzolanic Materials Waste Paper Sludge Ash Crushed Glass Waste Self Compacting Concrete Reinforced Concrete Buildings Bamboo Leaves Ash Laterized Concrete Blast Furnace Slag Recent Advances in Building Materials and Technologies Sreevalsa Kolathayar,K. S. Sreekeshava,N. Vinod Chandra Menon,2024-05-17 This book presents select proceedings of the International Conference on Interdisciplinary Approaches in Civil Engineering for Sustainable Development IACESD 2023 hosted under the aegis of the Group of Twenty G20 and Civil 20 C20 at Jyothy Institute of Technology Bengaluru India The topics covered in this book are sustainable materials with low embodied carbon such as recycled steel reclaimed wood and alternative binders like geopolymers concrete renewable materials like bamboo and straw energy efficient technologies including solar panels energy efficient insulation and smart building systems This book serves as a resource material for researchers and industry professionals interested in developing solutions for sustainable and resilient infrastructure that aims for communities with net zero targets *Handbook of Smart Materials, Technologies, and Devices* Chaudhery Mustansar Hussain,Paolo Di Sia,2022-11-09 This handbook brings together technical expertise conceptual background applications and societal aspects of Industry 4.0 the evolution of automation and data exchange in fabrication technologies materials processing and device manufacturing at both experimental and theoretical model scales The book assembles all the aspects of Industry 4.0 starting from the emergence of the concept to the consequences of its progression Drawing on expert contributors from around the world the volume details the technologies that sparked the fourth revolution and illustrates their characteristics potential and methods of use in the industrial and societal domains In addition important topics such as ethics privacy and security are considered in a reality where all data is shared and saved remotely The collection of contributions serve a very broad audience working in the fields of science and engineering chemical engineering materials science nanotechnology energy environment green chemistry sustainability electrical and electronic engineering solid state physics surface science aerosol technology chemistry colloid science device engineering and computer technology This handbook ideal reference libraries in universities and industrial institutions government and independent institutes individual research groups and scientists **Building Materials, Health and Indoor Air Quality** Tom Woolley,2016-10-04 The impact of building materials and construction methods on the health and wellbeing of occupants is often underestimated This book is an essential guide to understanding and avoiding hazardous materials and poor air quality in buildings The author covers a range of issues beginning with an explanation of how

buildings work and how this influences the health of occupants and users The text covers Ventilation air conditioning and indoor air quality Damp and mould Asthma and respiratory problems Cancer and endocrine disorders Radiation and radon Hazardous building materials used in construction Indoor air quality and emissions Ecological alternatives and approaches and remedies for sick buildings The book also guides the reader through the confusing world of regulations EU and international guidelines and certifications and provides a critical analysis of different theories of healthy buildings and philosophies Written in a clear and accessible style this book provides indispensable advice and information to anyone wishing to better understand healthy buildings and materials It is essential reading for architects surveyors public health professionals facilities managers and environmentalists

Manufacturing Technologies and Production Systems

Abhineet Saini, B. S. Pabla, Chander Prakash, Gurmohan Singh, Alokesh Pramanik, 2023-11-15 The book which is part of a two volume handbook set presents a collection of recent advances in the field of industrial engineering design and related technologies It includes state of the art research conducted in the fields of Industry 4.0 5.0 smart systems industries robotics and automation automobile engineering thermal and fluid engineering and its implementation Manufacturing Technologies and Production Systems Principles and Practices offers a comprehensive description of the developments in industrial engineering primarily focusing on industrial design automotive engineering construction and structural engineering thermo fluid mechanics and interdisciplinary domains The book captures emerging areas of materials science and advanced manufacturing engineering and presents the most recent trends in research for emerging researchers field engineers and academic professionals

Proceedings of 3rd International Sustainable Buildings Symposium (ISBS 2017)

Seyhan Firat, John Kinuthia, Abid Abu-Tair, 2018-03-28 This book describes the latest advances innovations and applications in the field of building design environmental engineering and sustainability as presented by leading international researchers engineers architects and urban planners at the 3rd International Sustainable Buildings Symposium ISBS held in Dubai UAE from 15 to 17 March 2017 It covers highly diverse topics including smart cities sustainable building and construction design sustainable urban planning infrastructure development structural resilience under natural hazards water and waste management energy efficiency climate change impacts life cycle assessment environmental policies and strengthening and rehabilitation of structures The contributions amply demonstrate that sustainable building design is key to protecting and preserving natural resources economic growth cultural heritage and public health The contributions were selected by means of a rigorous peer review process and highlight many exciting ideas that will spur novel research directions and foster multidisciplinary collaboration among different specialists
