textbook written for introductory courses in linguistic theory for undergraduate linguistics majors and first year graduate  
students Twelve major figures in the field bring their expertise to each of the core areas of the field morphology syntax  
semantics phonetics phonology and language acquisition In each section the book is concerned with discussing the  
underlying principles common to all languages showing how these are revealed in language acquisition and in the specific  
grammars of the world s languages Theoretical concepts are introduced through the analysis of a wide set of language data  
from Arabic to Zulu The student will learn how to do linguistics by working through real linguistic data Each section explains  
how to define and solve a problem organizes the data into paradigms revealing the structured patterns in the data formulates  
generalizations based on these patterns proposes rules or principles to account for the generalization seeks independent  
evidence in its argument for the proposed theoretical construct The book brings the latest developments in theoretical  
linguistics to bear in its discussion of the traditional issues It covers these subjects in greater depth than is found in most  
introductory texts permitting the student to proceed directly after using this text to graduate courses in the field It contains  
problems a glossary and a bibliography for further reading Linguistics is supported by an instructor s manual      **The**
