Hfss 13 Tutorial:

Co-simulations of Microwave Circuits and High-Frequency Electromagnetic Fields Mei Song Tong, Xiao Yu Li, 2024-07-03

This book aims to provide many advanced application topics for microwave circuits and high frequency electromagnetic EM fields by using advanced design system ADS and high frequency structure simulator HFSS as simulation platforms In particular it contains the latest multidisciplinary co simulation guidance on the design of relevant components and devices Currently the circuit field design and performance analysis and optimization strongly rely on various kinds of robust electronic design automation EDA software RF microwave engineers must grasp two or more types of related simulation design software ADS by Keysight and HFSS by Ansys are the representative for circuit simulations and for field and structural simulations of microwave devices respectively At present these two types of software are widely used in enterprises universities and research institutions The main purpose of this book is to enable readers who are interested in microwave engineering and applied electromagnetics to master the applications of these two tools It also helps readers expand their knowledge boundaries behind those types of software and deepen their understanding of developing interdisciplinary technologies by co simulations The book is divided into three parts The first part introduces the two latest versions of ADS and HFSS and helps readers better understand the basic principles and latest functions better It also advises how to choose appropriate simulation tools for different problems The second part mainly describes co simulations for high frequency EM fields microwave circuits antenna designs EM compatibility EMC and thermal and structural analyses It provides guides and advices on performing co simulations by ADS and HFSS incorporated with other types of software respectively The last part narrates the automation interfaces and script programming methods for co simulations It primarily deals with the Advanced Extension Language AEL Python Data Link PDL and MATLAB interface in ADS For HFSS it discusses VBScript IronPython scripting and Application Programming Interface APIs based on MATLAB Each topic contains practical examples to help readers understand so that they can gain a solid knowledge and skills regarding automated interfaces and scripting methods based on these kinds of software Concisely written in combination with practical examples this book is very suitable as a textbook in introductory courses on microwave circuit and EM simulations and also as a supplementary textbook in many courses on electronics microwave engineering communication engineering and related fields As well it can serve as a reference book for microwave engineers and researchers

Surrogate-Based Modeling and Optimization Slawomir Koziel, Leifur Leifsson, 2013-06-06 Contemporary engineering design is heavily based on computer simulations Accurate high fidelity simulations are used not only for design verification but even more importantly to adjust parameters of the system to have it meet given performance requirements Unfortunately accurate simulations are often computationally very expensive with evaluation times as long as hours or even days per design making design automation using conventional methods impractical These and other problems can be alleviated by the development and employment of

so called surrogates that reliably represent the expensive simulation based model of the system or device of interest but they are much more reasonable and analytically tractable This volume features surrogate based modeling and optimization techniques and their applications for solving difficult and computationally expensive engineering design problems It begins by presenting the basic concepts and formulations of the surrogate based modeling and optimization paradigm and then discusses relevant modeling techniques optimization algorithms and design procedures as well as state of the art developments The chapters are self contained with basic concepts and formulations along with applications and examples The book will be useful to researchers in engineering and mathematics in particular those who employ computationally heavy simulations in their design work

New Developments and Applications in Sensing Technology Subhas Chandra Mukhopadhyay, Aimé Lay-Ekuakille, Anton Fuchs, 2011-01-22 This book has focussed on different aspects of smart sensors and sensing technology i e intelligent measurement information processing adaptability recalibration data fusion validation high reliability and integration of novel and high performance sensors in the areas of magnetic ultrasonic vision and image sensing wireless sensors and network microfluidic tactile gyro flow surface acoustic wave humidity and ultra wide band While future interest in this field is ensured by the constant supply of emerging modalities techniques and engineering solutions as well as an increasing need from aging structures many of the basic concepts and strategies have already matured and now offer opportunities to build upon The book has primarily been focussed for postgraduate and research students working on different aspects of design and developments of smart sensors and sensing technology
