hands on undergraduate textbook for CS2 courses Active learning and real world projects underpin each chapter briefly
reviewing programming fundamentals then progressing to core data structures and algorithms topics including recursion
lists stacks trees graphs sorting and complexity analysis Creative projects and applications put theoretical concepts into
practice helping students master the fundamentals Dedicated project chapters supply further programming practice using
real world interdisciplinary problems which students can showcase in their own online portfolios Example Interview
Questions sections prepare students for job applications The pedagogy supports self directed and skills based learning with
over 250 Try It Yourself boxes many with solutions provided and over 500 progressively challenging end of chapter questions
Written in a clear and engaging style this textbook is a complete resource for teaching the fundamental skills that today s
