Health Part A examination **Social Research Methodology and New Techniques in Analysis, Interpretation, and Writing** Islam, M. Rezaul,2018-12-07 The importance of scientific investigation and research is becoming more pronounced in today's society with many organizations relying on this research to make informed decisions. As such, research methodology courses have been integrated into undergraduate and master's programs at most academic institutions where students are being challenged to conduct and write research. **Social Research Methodology and New Techniques in Analysis, Interpretation and Writing** is a pivotal reference source that provides vital research on the main concepts of research writing, including the guidelines of research methodology and proposal designing. While highlighting topics such as mixed method research, research objectives, and project proposals, this publication provides examples of eight PhD proposals and the frameworks used in organizing qualitative, quantitative, and mixed method research. The book focuses on communities classified by the government as Geographically Isolated and Disadvantaged Areas (GIDA) on the culturally rich island of Mindanao, Philippines. The focus is centered on GIDA communities because they are assumed to receive less information and help in relation to their circumstances. This book accounts for the disaster preparedness and communicative conditions of people living in GIDAs and identifies synergies and tensions in the engagement process. As such, specific branches of enquiry focus on how information seeking and sharing experiences of GIDA communities inform the current practice of community engagement. In taking this research approach, this book deliberately gives voice to these marginalized and often silenced communities. In general, the study examines other possibilities or variables in the pre-disaster risk communication process that truly engage geographically isolated and socioeconomically disadvantaged communities in disaster risk reduction and management (DRRM). Considering the existing methodologies used to engage local communities in DRRM, this book looks at ways in which bottom-up and top-down approaches could be melded together for a transformational level of engagement in these communities. The novelty of addressing issues concerning geographically isolated communities in a developing country is a research track worthy of being investigated by academics. The book is of interest to students and in development communication and disaster risk communication, as well as community engagement practitioners specializing in DRRM. The framework proposed in this book for engaging isolated communities is helpful to practitioners in designing, planning, and implementing pre-disaster communication and community engagement programs. Serving Vulnerable and Marginalized Populations in Social and Educational Contexts Anies Al-Hroub, Sally Reis, Joseph Madaus, Itab Shuayb, 2024-04-26. There is evidence that the global COVID-19 crisis is exacerbating existing inequalities and marginalization of vulnerable groups, including exceptional learners, stateless, street migrant, and refugee children and youths, and the limited use of frameworks of emergency planning with and for marginalized and at-risk individuals. These challenges are multi-sectoral and intersecting, and they require multi- and interdisciplinary interventions to inform inclusive responses. These issues include being at a greater risk of excluding vulnerable learners from gaining access to equitable education, online, remote, and blended education. Intersecting forms of discrimination, such as gender, socioeconomic, and legal status, further exacerbate the problem. This has alerted us to examine the living conditions of marginalized and vulnerable populations around the globe and to reveal their experiences, problems, and needs from an educational perspective, thus bringing insights into their vulnerabilities during the pandemic.
