The Fuzzy and the Techie Scott Hartley, 2017-04-25 Artfully explains why it is time for us to get over the false division between the human and the technical Tim Brown CEO of IDEO and author of Change by Design Scott Hartley first heard the terms fuzzy and techie while studying political science at Stanford University If you majored in humanities or social sciences you were a fuzzy If you majored in computer or hard sciences you were a techie While Silicon Valley is generally considered a techie stronghold the founders of companies like Airbnb Pinterest Slack LinkedIn PayPal Stitch Fix Reddit and others are all fuzzies in other words people with backgrounds in the liberal arts In this brilliantly counterintuitive book Hartley shatters assumptions about business and education today learning to code is not enough The soft skills curiosity communication and collaboration along with an understanding of psychology and society's gravest problems are central to why technology has value Fuzzies are the instrumental stewards of robots artificial intelligence and machine learning They offer a human touch that is of equal if not greater importance in our technology led world than what most techies can provide For anyone doubting whether a well rounded liberal arts education is practical in today's world Hartley's work will come as an inspiring revelation Finalist for the 2016 Financial Times McKinsey Bracken Bower Prize and A Financial Times Business Book of the Month

**Data Driven Investing** Mitchell R. Hardy, Bill Matson, 2004

The Big Data Revolution Winnifred O'Connell, The morning alarm clock rings at 6:30 AM just as it has for millions of people across the globe But what those sleepy individuals don't realize is that their simple act of reaching for their smartphone to silence the alarm has already triggered a cascade of data collection that will influence their entire day The moment they swipe the screen their device begins transmitting information about their location the time they woke up their sleep patterns from the night before and even the ambient light in their bedroom This data seemingly insignificant in isolation becomes part of a vast digital ecosystem that is quietly revolutionizing how businesses operate governments make decisions and societies function We are living through what historians will likely call the most significant information revolution since the invention of the printing press The Big Data Revolution represents a fundamental shift in how human civilization processes understands and acts upon information Unlike previous technological advances that

primarily affected specific industries or regions the data revolution touches every aspect of modern life from the food we eat to the entertainment we consume from the healthcare we receive to the transportation we use The scale of this transformation is staggering Every day humanity generates approximately 2.5 quintillion bytes of data To put this in perspective if you were to store this amount of information on standard DVDs the stack would reach from Earth to the Moon and back again twice This exponential growth in data generation is not merely a byproduct of our digital age but has become the driving force behind innovation economic growth and competitive advantage across industries
