Wohlhuter,1996 This investigation of secondary geometry teachers decision making in a mathematics curricular reform context examined the following questions a What planning and interactive decisions were secondary geometry teachers making during this time of reform and b what factors influenced the decisions that these teachers made In addition comparisons were generated between influential factors identified during a mathematics reform context and the stable context of previous decision making studies A multi case study approach involving detailed examination of five geometry teachers decision making was used The data collected and analyzed included a questionnaire interviews observational field notes audiotapes and videotapes of classroom instruction and written instructional documents Teachers profiles were created describing geometry and teaching biographies views toward curricular change the classroom planning decisions and influential factors and interactive decisions and influential factors Findings were developed by searching for similarities and

differences across the sample Teachers decisions generated descriptions of their geometry courses One teacher promoted geometry as a mathematical system using predominantly a lecture approach The other four teachers advocated a multifaceted view of geometry recognizing geometry as a mathematical system and as a setting for developing communication and problem solving skills In addition the four teachers courses included references to connections between geometry and the real world These four teachers used a variety of instructional approaches that encouraged students active involvement in their geometry learning with an emphasis on developing student understanding Factors influencing teachers decisions included a past geometry experiences b professional development experiences c articulated course goals d advanced planning decisions e teachers beliefs f the geometry textbook and other materials g teachers school settings and h students needs and actions Some findings highlighted differences between this study and previous decision making studies All teachers in this study appeared to be influenced by their beliefs about the nature of geometry as a discipline Teachers were also influenced by whether they viewed the process of becoming an effective teacher as a life long process For four of the teachers reform agendas were influential as another source of curriculum ideas
