A Study of Malignant Narcissism Richard Wood,2022-07-28 A Study
of Malignant Narcissism offers a unique insight into malignant narcissism exploring both its personal and professional
aspects and constructing a theoretical framework that renders its origins and manifestations more accessible With reference
to his own family dynamic and to 45 years of professional experience Richard Wood explores the psychology of malignant
narcissism positing it as a defence against love The book first offers an overview of existing literature before examining
relevant clinical material including an analysis of Wood s relationships with his own parents Wood presents vignettes
illustrating the core dynamics that drive narcissism illustrated with sections of his father s unpublished autobiography and
with his patient work The book makes the case for malignant narcissism to be considered a subtype of psychopathy and puts
forth a framework setting out the key dynamics that typify these individuals including consideration of the ways in which
malignant narcissism replicates itself in varied forms Finally Wood examines the impact of narcissistic leadership and
compares his theoretical position with those of other clinicians This book will be of interest to clinical psychologists
psychoanalysts and psychotherapists as well as all professionals working with narcissistic patients
