### ABSTRACT

Using specialized knowledge and perspectives of a set in decision-makings about issues that are qualitative is very helpful. Delphi technique is a group knowledge acquisition method, which is also used for qualitative issue decision-makings. Delphi technique can be used for qualitative research that is exploratory and identifying the nature and fundamental elements of a phenomenon is a basis for study. It is a structured process for collecting data during the successive rounds and group consensus. Despite over a half century of using Delphi in scientific and academic studies, there are still several ambiguities about it. The main problem in using the Delphi technique is lack of a clear theoretical framework for using this technique. Therefore, this study aimed to present a comprehensive theoretical framework for the application of Delphi technique in qualitative research. In this theoretical framework, the application and consensus principles of Delphi technique in qualitative research were clearly explained.

### I. INTRODUCTION

Delphi is a name of temple in ancient Greek, which is the origin of Apollo's divine inspirations, god of sun and music. Greeks and ancient nations came in Pythia, the goddess of Delphi temple to predict the future [1] [2]. The Delphi technique was originally proposed based on people's conjecture, judgment, and inspiration but gradually took the academic form. For the first time in the late 1950s, in a research by U.S. RAND Corporation, the Delphi was introduced for the scientific study of experts' opinions on military defense project. However, for the security reasons, this technique was not proposed over ten years and in 1963, Dalkey and Helmer introduced it [3] [4]. Its first non-military use was suggested for economic development planning [5] [6] [7]. This technique gradually found its place in the academic studies but from the mid-90s, it became highly popular. Landeta's study indicated that since 1995 to 1999 a total 444 articles on this technique have been published in "Science Direct" and "ABI / Inform" journals. Since 2000 to 2004, this number has increased to 667 articles [6]. Among the various features of the Delphi technique, its four features are usually unchanged including anonymity, iteration, controlled feedback, and statistical "group response" [8] [9] [10].

Most researchers have used all [11] or some [12] [13] of the definition set out by Linstone and Turoff (1975) who define the Delphi technique as "a method for structuring a group communication process so that the process is effective in allowing a group of individuals, as a whole, to deal with a complex problem" (p. 3) [14]. The main purpose of the Delphi method is "to acquire the most reliable consensus of a group of experts' opinion by 'a series of intensive questionnaires combined with controlled opinion feedback' (p. 458) [15]. By obtaining the consensus of a group of experts using the process, researchers can identify and prioritize issues and develop a framework to recognize them [16] [2]. Hasson et al. (2000) argued that modified Delphi, policy Delphi, and real-time Delphi have all been used, while there are many potential types of Delphi techniques [17]. Three broad categories are generally in use and these are classical, policy and decision [18]. The Delphi technique is applied as a tools and method for consensus building using a series of questionnaires for data collection from a panel of selected participants [15] [19] [14] [20] [21] [22].

*Research Methodology in Management and Industrial Engineering* Carolina Machado, J. Paulo Davim, 2020-03-13 This book deals with methodological issues in the field of management and industrial engineering. It aims to answer the following questions that researchers face every time they look to develop their research: How can we design a research project? What kind of paradigm should we follow? Should we develop a qualitative phenomenological research or a quantitative positivistic one? What techniques for data collections can we use? Should we use the entire population or a sample? What kind of sampling techniques can we have? This book provides discussion and the exchange of information on principles, strategies, models, techniques, applications, and methodological options possible to develop in research in management and industrial engineering. It communicates the latest developments and thinking on the research methodologies subject in the different areas worldwide. It seeks cultural and geographic diversity in studies highlighting research methodologies that can be used in these different study areas. This book has a special interest in research on important issues that transcend the boundaries of single academic subjects. It presents contributions that challenge the paradigms and assumptions of individual disciplines or functions with chapters grounded in conceptual and/or empirical literature. The main aim of this book is to provide a channel of communication to disseminate knowledge between academics and researchers with a special focus on the management and industrial engineering fields. This book can serve as a useful reference for academics, researchers, managers, engineers, and other professionals in related matters with research methodologies. Contributors have identified the theoretical and practical implications of their methodological options to the development and improvement of their different study and research areas.

*Advanced Transdisciplinary Engineering and Technology* Azman Ismail, Mohd Amran, Mohd Daril, Andreas Öchsner, 2022-05-31 This book reports research findings and outcome from various disciplines of engineering and technology focusing on industrial technology operation and sustainable development. The content is the results of research done at the Research and Innovation Section of the Universiti Kuala Lumpur MITEC as well as several experts from other institutions in Malaysia. The content describes the latest knowledge and development aligned with current trends of industrial technology operation in Malaysia.

*Psychological Assessment and Interventions for Individuals Linked to Radicalization and Lone Wolf Terrorism* Carlo Lazzari, 2021-09-02 In recent times the phenomenon of lone wolf terrorism has been observed with the social assumption that a radicalized individual is only guided by personal, social, and ethnic reasons to commit an extremist act. Nevertheless, there is still much to understand about this phenomenon and improve the methods of investigation or psychiatric interventions. This handbook attempts to cover gaps in understanding the psychiatric aspects of radicalization and the phenomenon of lone wolf terrorism. Edited by expert clinical psychologists, the contributors have taken both a qualitative and theoretical route to analyze the phenomenon prompted by their clinical experience with mental health professionals being in contact with radicalized people living in local towns and prisons. Key Features: Addresses the topic of lone wolf

terrorism from multiple angles including psychological aspects social aspects philosophical aspects and prevention Provides insights into forensic psychiatric methods used to study terrorism Includes contributions from several mental health experts Explains information in a concise easy to comprehend manner Includes references for further research Psychological Assessment and Interventions for Individuals Linked to Radicalization and Lone Wolf Terrorism serves as a practical handbook for psychologists psychiatrists criminologists social workers allied professionals such as law enforcement officers and students in criminology social science or psychology programs for example who want to learn about the causes and prevention of terrorism with a focus on radicalization processes and lone wolf agents **Sustainable Maintenance**
