Rescue of Business in Europe Bob Wessels, Stephan Madaus, European Law Institute, 2020-01-30
This edited volume is based on the European Law Institute's project The Rescue of Business in Insolvency Law which ran from 2013 to 2016. The project sought to investigate and articulate the essential features of well functioning procedures for the rescue of distressed but viable businesses. Although the focus was primarily on the design and implementation of formal procedures that is those provided by law, the project also required consideration of the interaction between such procedures and informal solutions to distress given the obvious cost advantages of the latter. The ELI project was not confined exclusively to restructurings since these are only one possible route to maximising the value of a distressed but viable business. An auction procedure in which the business is sold on a going concern basis to a new owner is one obvious alternative. The ELI project encompasses various aspects of both public constitutional law and insolvency law that may have a bearing on the functionality of formal restructuring procedures.

Practical Accounting for Farm and Rural Business Ben Brown, 1991
What is it all about? The balance sheet. The profit and loss account. Book keeping. From cash analysis to year end accounts. Double entry book keeping. But it is not so simple. A step further. Bringing it all together. What can the accounts tell us now? Gross margins for green farm. Planning for the future. Theory. Planning the future practice. The cash flow budget for green farm. More from the accounts. Ratios and trends for green farm. A step further with double entry book keeping for a horticultural business. Will the computer do it all for us? Financing the business. The tax man cometh.
