data computing power talent and institutions Data is a vital resource like coal or oil but it must be collected and refined
Advanced computer chips are the essence of computing power control over chip supply chains grants leverage over rivals
Talent is about people which country attracts the best researchers and most advanced technology companies The fourth
battlefield is maybe the most critical the ultimate global leader in AI will have institutions that effectively incorporate AI into
their economy society and especially their military Scharre s account surges with futuristic technology He explores the ways
AI systems are already discovering new strategies via millions of war game simulations developing combat tactics better than
any human tracking billions of people using biometrics and subtly controlling information with secret algorithms He visits
China s National Team of leading AI companies to show the chilling synergy between China s government private sector and
surveillance state He interviews Pentagon leadership and tours U S Defense Department offices in Silicon Valley revealing
deep tensions between the military and tech giants who control data chips and talent Yet he concludes that those tensions
inherent to our democratic system create resilience and resistance to autocracy in the face of overwhelmingly powerful
technology Engaging and direct Four Battlegrounds offers a vivid picture of how AI is transforming warfare global security
and the future of human freedom and what it will take for democracies to remain at the forefront of the world order
