

# LOGICS AND PHILOSOPHY

## Introduction

Logic as a field of study is a branch of philosophy that deals with the study of arguments. As an instrument, it is a means to construct rational arguments and evaluate the argument of others. Philosophy is the study of general and fundamental problems concerning matters such as existence, knowledge, truth, beauty, law, justice, validity, mind, and language.

## Objectives of the following lecture:

- ❖ Understand the meaning, nature and features of philosophy;
- ❖ Recognize the major fields of philosophy; and
- ❖ Understand why it is so important to learn logic and philosophy.

## Meaning and nature of philosophy

No specific subject matter, so it is difficult to define it. It is the development of critical habits, the continuous search for truth, and the questioning of the apparent. Philosophy deals primarily with issues than subject matters.

- **Philosophy begins from wonder!**

- *“Wonder is the feeling of a philosopher, and philosophy begins in wonder”  
(Socrates)*

**Etymologically:** from two Greek words ‘philo’ and ‘sophia’, which means Love and wisdom respectively!

- Hence, it means **love of wisdom!**
- Philosophical questions:
  - Does God exist?
  - What is reality?
  - What is knowledge?

logical modalities necessity and possibility held by leading philosophers from Aristotle in ancient Greece to Rudolf Carnap in the twentieth century The story begins with an illuminating discussion of Aristotle s views on the connection between logic and metaphysics continues through the Stoic and mediaeval including Arabic traditions and then moves to the early modern period with particular attention to Locke and Leibniz The views of Kant Peirce C I Lewis and Carnap complete the volume Many of the essays illuminate the connection between the historical figures studied and recent or current work in the philosophy of modality The result is a rich and wide ranging picture of the history of the logical modalities
