Peter Morris,2009-04-16 Today the baseball catcher is a familiar but uninspiring figure Decked out in the so called tools of
ignorance he stolidly goes about his duty without attracting much attention But it wasn't always that way as Peter Morris
shows in this lively and original study In baseball's early days catchers stood a safe distance behind the batter Then the
introduction of the curveball in the 1870s led them to move up directly behind home plate even though they still wore no
gloves or protective equipment Extraordinary courage became the catcher's most notable requirement but the new
positioning also demanded that the catcher have lightning fast reflexes great hands and a cannon for a throwing arm
