RETRIEVE METHOD

Create a charge

To charge a credit card or other payment source, you create a `Charge` object. If your API key is in test mode, the supplied payment source (e.g., `card`) won't actually be charged, although everything else will occur as if in live mode. (Stripe assumes that the charge would have completed successfully).

Arguments

amount <small>required</small>	A positive integer representing how much to charge, in the smallest currency unit (e.g., 100 cents to charge \$1.00, or 100 to charge ¥100, a zero-decimal currency). The minimum amount is \$0.50 USD or equivalent in charge currency.
currency <small>required</small>	Three-letter ISO currency code, in lowercase. Must be a supported currency.
application_fee <small>optional</small>	A fee in cents that will be applied to the charge and transferred to the application owner's Stripe account. The request must be made with an OAuth key or the <code>Stripe-Account</code> header in order to take an application fee. For more information, see the application fees documentation.

POST /v1/charges

Example Request

```
curl https://api.stripe.com/v1/charges \
  -H 'sk_test_4e238b20c83c7c8c561e8c9314c4128d' \
  -d amount=100 \
  -d currency=usd \
  -d source=tok_visa \
  -d description='Charge for jenny.ross@example.com'
```

Example Response

```
{
  "id": "ch_198202ad0012001200120012",
