

Coders At Work

J Ma

Coders At Work:

Coders at Work Peter Seibel, 2009-12-21 Peter Seibel interviews 15 of the most interesting computer programmers alive today in *Coders at Work* offering a companion volume to Apress's highly acclaimed best seller *Founders at Work* by Jessica Livingston. As the words at work suggest Peter Seibel focuses on how his interviewees tackle the day to day work of programming while revealing much more like how they became great programmers how they recognize programming talent in others and what kinds of problems they find most interesting. Hundreds of people have suggested names of programmers to interview on the *Coders at Work* web site www.codersatwork.com. The complete list was 284 names. Having digested everyone's feedback we selected 15 folks who've been kind enough to agree to be interviewed: Frances Allen Pioneer in optimizing compilers first woman to win the Turing Award 2006 and first female IBM fellow; Joe Armstrong Inventor of Erlang; Joshua Bloch Author of the Java collections framework now at Google; Bernie Cosell One of the main software guys behind the original ARPANET IMPs and a master debugger; Douglas Crockford JSON founder JavaScript architect at Yahoo; L. Peter Deutsch Author of Ghostscript implementer of Smalltalk 80 at Xerox PARC and Lisp 1.5 on PDP 1; Brendan Eich Inventor of JavaScript CTO of the Mozilla Corporation; Brad Fitzpatrick Writer of LiveJournal OpenID memcached and Perlbal; Dan Ingalls Smalltalk implementor and designer; Simon Peyton Jones Coinventor of Haskell and lead designer of Glasgow Haskell Compiler; Donald Knuth Author of *The Art of Computer Programming* and creator of TeX; Peter Norvig Director of Research at Google and author of the standard text on AI; Guy Steele Coinventor of Scheme and part of the Common Lisp Gang of Five currently working on Fortress; Ken Thompson Inventor of UNIX; Jamie Zawinski Author of XEmacs and early Netscape Mozilla hacker.

Program Guide United States. Veterans Administration. Department of Medicine and Surgery, 1961. 100

Things You Don't Wanna Know about Coders at Work Joseph Finning, 2013-02 In this book we have hand picked the most sophisticated unanticipated absorbing if not at times crackpot original and musing book reviews of *Coders at Work*. Reflections on the Craft of Programming. Don't say we didn't warn you these reviews are known to shock with their unconventionality or intimacy. Some may be startled by their biting sincerity others may be spellbound by their unbridled flights of fantasy. Don't buy this book if 1 You don't have nerves of steel 2 You expect to get pregnant in the next five minutes 3 You've heard it all.

A Guide for studying the utilization of nursing service personnel in Veterans

Administration hospitals United States. Veterans Administration. Nursing Service, 1961. *Perspectives on HCI* Andrew Monk, G. Nigel Gilbert, 1995 The field of human computer interaction HCI has attracted researchers with interests as diverse as formal mathematics ethnography cognitive psychology and conversation analysis. Each approach has different assumptions and perspectives on the practical problem of designing more effective systems. *Perspectives on HCI: Diverse Approaches* contains 10 tutorial chapters each written to illustrate a particular approach to HCI. The authors are all international authorities in their particular fields. The book will be of interest to researchers and students in computer science management.

science psychology human factors ergonomics and sociology who want to know how other disciplines approach the practical problem of making computers into more effective tools for people to use Key Features Covers widely different research disciplines Written by international authorities in each area Provides accessible and concise introductions to important areas and approaches Each chapter contains a list of references for further reading
