Elementary and Intermediate Algebra Alan S. Tussy, R. David Gustafson, 2001-08 This book has been designed to present the material, reinforce major concepts, and test student understanding using a variety of instructional methods and features. The authors had seven objectives in writing this text:

- 1 To teach students the language of algebra: how to read, write, speak, and think mathematically. Graphics, examples, and Study Sets throughout the text emphasize key phrases and translation.
- 2 To use a group of fundamental algebraic concepts as the foundation of the text: introduce equations, variables, problem solving, functions, and graphing in Chapter 1 and constantly reinforce those major concepts of algebra throughout the text. Key Concept feature.
- 3 To aid student comprehension and confidence by introducing concepts in one context and revisiting throughout the book in other contexts. Coverage of problem solving is one good example.
- 4 To gain and keep students' attention through creative applications. See any Applications section in Study Sets: an interactive approach to instruction, Self Checks, and a visually appealing design.
- 5 To have top-notch problem sets purposefully named Study Sets, not Problem or Exercise Sets, that break learning into smaller pieces so that students do not become overwhelmed.
- 6 To constantly show how the material being studied can be used to solve real-world problems.
- 7 To blend traditional and reform instructional approaches from vocabulary practice and well-defined pedagogy to place an emphasis on problem solving, reasoning, communicating, and technology. Study Sets.
