W. Graham Solomons, Craig B. Fryhle, Scott A. Snyder, 2016-01-19 The 12th edition of Organic Chemistry continues Solomons Fryhle Snyder's tradition of excellence in teaching and preparing students for success in the organic classroom and beyond A central theme of the authors' approach to organic chemistry is to emphasize the relationship between structure and reactivity To accomplish this the content is organized in a way that combines the most useful features of a functional group approach with one largely based on reaction mechanisms The authors' philosophy is to emphasize mechanisms and their common aspects as often as possible and at the same time use the unifying features of functional groups as the basis for most chapters The structural aspects of the authors' approach show students what organic chemistry is Mechanistic aspects of their approach show students how it works And wherever an opportunity arises the authors show students what it does in living systems and the physical world around us Textbook of Peritoneal Dialysis R. Gokal, Ramesh Khanna, Raymond T. Krediet, K.D. Nolph, 2013-11-27 In 1994 the expert knowledge of Ram Gokal and Karl D Nolph the two foremost figures in the field of peritoneal dialysis was combined to produce the first edition of the Textbook of Peritoneal Dialysis The work quickly became recognised as the gold standard for those working in the field Since its conception however our understanding of peritoneal dialysis related physiology kinetics and clinical outcomes as well as the concepts of intraperitoneal chemotherapy has increased sufficiently to make an updated and completely revised edition of the work necessary An expansion of the editorial team by fellow experts Ramesh Khanna and Raymond Krediet enabled an even more comprehensive approach to be taken This second edition reasserts the book's uniqueness in its detailed discussion of the topic making it required reading for all those working within the field of peritoneal dialysis *Journal of the Society of Chemical Industry* Society of Chemical Industry (Great Britain), 1905 Chemistry, Student Study Guide John A.
