MASS *Selecta* Svetlana Katok, A. B. Sossinsky, Serge Tabachnikov, This book results from a unique and innovative program at Pennsylvania State University Under the program the best of the best students nationwide are chosen to study challenging mathematical areas under the guidance of experienced mathematicians This program Mathematics Advanced Study Semesters MASS offers an unparalleled opportunity for talented undergraduate students who are serious in the pursuit of mathematical knowledge This volume represents various aspects of the MASS program over its six year existence including core courses summer courses students research and colloquium talks The book is most appropriate for college professors of mathematics who work with bright and eager undergraduate and beginning graduate students for such students who want to expand their mathematical horizons and for everyone who loves mathematics and wants to learn more interesting and unusual material The first half of the book contains lecture notes of nonstandard courses A text for a semester long course on p adic analysis is centered around contrasts and similarities with its real counterpart A shorter text focuses on a classical area of interplay between geometry algebra and number theory continued fractions hyperbolic geometry and quadratic forms Also provided are detailed descriptions of two innovative courses one on geometry and the other on classical mechanics These notes constitute what one may call the skeleton of a course leaving the instructor ample room for innovation and improvisation The second half of the book contains a large collection of essays on a broad spectrum of exciting topics from Hilbert's Fourth Problem to geometric inequalities and minimal surfaces from mathematical billiards to fractals and tilings from unprovable theorems to the classification of finite simple groups and lexicographic codes

The Imperfect and Unfinished Math Teacher [Grades K-12] Chase Orton, 2022-02-24 The system won't do it for us But we have each other In *The Imperfect and Unfinished Math Teacher: A Journey to Reclaim Our Professional Growth* master storyteller Chase Orton offers a vulnerable and courageous grassroots guide that leads K-12 math teachers through a journey to cultivate a more equitable inclusive and cohesive culture of professionalism for themselves what he calls professional flourishing The book builds from two bold premises First that as educators we are all naturally imperfect and unfinished and growth should be our constant goal Second that the last 40 years of top-down PD efforts in mathematics have rarely supplied teachers with what they need to equitably grow their practice and foster classrooms that are likewise empowered inclusive and cohesive With gentle humanity this book inspires teachers to break down silos observe each other's classrooms interrogate their own biases and put students at the center of everything they do in the math classroom This book Weaves raw and authentic stories both personal and those from other educators into a relatable and validating narrative Offers interactive opportunities to self-reflect build relationships seek new vantage on our teaching by observing others classrooms and students and share and listen to other's stories and experiences Asks teachers to give and accept grace as they work collaboratively to better themselves and the system from within so that they can truly serve each of their students

authentically and equitably Implementing the beliefs and actions in this book will position teachers to become more active partners in each other's professional growth so that they can navigate the obstacles in their professional landscape with renewed focus and a greater sense of individual and collective efficacy It equips teachers and by extension their students to chart their own course and author their own equitable and joyful mathematical and professional stories
