Data Skills for Media Professionals Ken Blake,Jason Reineke,2019-08-01 Teaches the basic yet all

important data skills required by today's media professionals. The authors of *Data Skills for Media Professionals* have assembled a book that teaches key aspects of data analysis, interactive data visualization, and online map making through an introduction to Google Drive, Google Sheets, and Google My Maps, all free, highly intuitive, platform-agnostic tools available to any reader with a computer and a web connection. Delegating the math and design work to these apps leaves readers free to do the kinds of thinking that media professionals do most often: considering what questions to ask, how to ask them, and how to evaluate and communicate the answers. Although focused on Google apps, the book draws upon complementary aspects of the free QGIS geographic information system, the free XLMiner Analysis ToolPak Add-on for Google Sheets, and the ubiquitous Microsoft Excel spreadsheet application. Worked examples rely on frequently updated data from the U.S. Bureau of Labor Statistics, the Federal Election Commission, the National Bridge Inventory of structurally deficient bridges, and other federal sources, giving readers the option of immediately applying what they learn to current data they can localize to any area in the United States. The book offers chapters covering basic data analysis, data visualization, making online maps, Microsoft Excel, and pivot tables, matching records with Excel's VLOOKUP function, basic descriptive and inferential statistics, and other functions, tools, and techniques. Serves as an excellent supplemental text for easily adding data skills instruction to courses in beginning or advanced writing and reporting. Features computer screen captures that illustrate each step of each procedure. Offers downloadable datasets from a companion web page to help students implement the techniques themselves. Shows realistic examples that illustrate how to perform each technique and how to use it on the job. *Data Skills of Media Professionals* is an excellent book for students taking skills courses in the more than 100 ACEJMC accredited journalism and mass communication programs across the United States. It would also greatly benefit those enrolled in advanced or specialized reporting courses, including courses dedicated solely to teaching data skills.

[Security and Privacy in Communication Networks](#) Joaquin Garcia-Alfaro, Shujun Li, Radha Poovendran, Hervé Debar, Moti Yung, 2021-11-03. This two-volume set LNICST 398 and 399 constitutes the post-conference proceedings of the 17th International Conference on Security and Privacy in Communication Networks, SecureComm 2021, held in September 2021. Due to the COVID-19 pandemic, the conference was held virtually. The 56 full papers were carefully reviewed and selected from 143 submissions. The papers focus on the latest scientific research results in security and privacy in wired, mobile, hybrid, and ad hoc networks in IoT technologies, in cyber-physical systems, in next-generation communication systems, in web and systems security, and in pervasive and ubiquitous computing.

The Complete Guide to Using Google in Libraries Carol Smallwood, 2015-02-26. Carol Smallwood's *The Complete Guide to Using Google in Libraries: Volume 1: Instruction Administration and Staff Productivity* explores how Google's suite of tools, from Google Docs (now Google Drive), Google Scholar, Hangout, Forms, and others, made freely available to the Internet Community, can be used by libraries to expand the role of digital operations in the management of library materials, to communicate with their patrons and collaborators, to exploit the resources on the Web.

and many others The book has 29 chapters organized into sections that focus on ways that Google's suite of tools can be applied to address problems in a specific area of library concern The section headings are Library Instruction for Users Collaboration within and among libraries Library Administration Collection Management and Library Productivity In each topical area the chapters show how librarians are taking advantage of these tools to change the way that their library works All of this without the burden of an additional bill to pay Through these carefully selected case studies from real libraries you will be able to learn about the surprising and powerful potential that exists through Google tools to improve library operations
