GPT-3 Sandra Kublik, Shubham Saboo, 2022-07-11 GPT 3 NLP with LLMs is a unique pragmatic take on Generative Pre trained Transformer 3 the famous AI language model launched by OpenAI in 2020 This model is capable of tackling a wide array of tasks like conversation text completion and even coding with stunningly good performance Since its launch the API has powered a staggering number of applications that have now grown into full fledged startups generating business value This book will be a deep dive into what GPT 3 is why it is important what it can do what has already been done with it how to get access to it and how one can build a GPT 3 powered product from scratch This book is for anyone who wants to understand the scope and nature of GPT 3 The book will evaluate the GPT 3 API from multiple perspectives and discuss the various components of the new burgeoning economy enabled by GPT 3 This book will look at the influence of GPT 3 on important AI trends like creator economy no code and Artificial General Intelligence and will equip the readers to structure their imaginative ideas and convert them from mere concepts to reality

Spring AI in Action Craig Walls, 2025-12-02 Use Spring AI to add generative AI features like virtual assistants text summaries and suggestions to your Java applications No matter what kind of software you re building there s a huge demand for AI features Until recently though Java developers have had few good tools for adding AI features to existing and new applications Spring AI an exciting new extension for Spring and Spring Boot changes the equation Spring AI provides generative AI capabilities natively within the framework so you can stick with Java end to end Spring AI in Action shows you how In Spring AI in Action you will Learn Spring AI from the ground up Create text summaries virtual assistants and more in Spring Boot applications RAG and other techniques to improve LLM responses Text from images and images from text Spring AI makes it much much easier to add generative AI features to Spring applications With this powerful framework extension you can write familiar Java code to build AI features like virtual assistants text summaries and smart search suggestions About the technology When it comes to AI applications no Python no problem The Spring AI framework makes it possible to add LLM based features to any Spring application using Java or other JVM languages like Kotlin From setting up Retrieval Augmented Generation RAG to creating AI agents Spring AI is fast powerful and instantly familiar About the book In Spring AI in Action bestselling author Craig Walls shows you how to build AI applications natively using Spring AI and Spring Boot You ll start with a simple Hello AI World example and quickly advance to more sophisticated techniques including RAG AI agents tool use speech and AI observability You ll see Craig s practical example driven approach with a relentless emphasis on getting stuff done What s inside Learn Spring AI from the ground up Create text summaries virtual assistants and more RAG agents and multimodal AI Chat and conversational memory AI tool use About the reader For Spring developers No Generative AI skills required About the author Craig Walls is a principal engineer a member of the Spring engineering team and a frequent conference speaker He is the author of Spring in Action the bestselling book ever published on Spring Framework

Table of Contents 1 Getting started with

Spring AI 2 Evaluating generated responses 3 Submitting prompts for generation 4 Talking with your documents 5 Enabling conversational memory 6 Activating tool driven generation 7 Applying Model Context Protocol 8 Generating with voice and pictures 9 Observing AI operations 10 Safeguarding generative AI 11 Applying generative AI patterns 12 Employing agents

Ubi-Media Computing, Pervasive Systems, Algorithms and Networks Lin Hui,Ching-Hsien Hsu,Somchoke

Ruengittinun,2025-07-18 This 2 volume set constitutes the refereed proceedings of the 17th International Symposium on Pervasive Systems Algorithms and Networks I SPAN 2025 and 13th International Conference on Ubi Media Computing Ubi Media 2025 held in Bangkok Thailand in January 19 23 2025 The 36 full papers and 16 short papers presented in this book were carefully reviewed and selected from 95 submissions They are categorized into the following topical sections Part 1 Edge Computing and IoT Application Optimization and Deep Learning Application System and Network Application Cybersecurity Technique and Application Machine Learning on Multimedia and Applications Part 2 Prediction Methods and Application Data Processing and Detection Methods Edge Computing and IoT Application Multimedia Networks System and Applications Machine Learning on Intelligent Application Systems

Understanding Business Ethics Peter A. Stanwick,Sarah D. Stanwick,2024-05-30 *Understanding Business Ethics* delves into the pivotal world of business ethics illuminating the complexities of ethical behavior in the global business landscape The updated Fourth Edition intricately weaves together global perspective real world business cases and a recurrent theme preparing students and professionals for ethical decision making situations in their respective careers

Introduction to Generative AI, Second Edition Numa Dhamani,2026-01-13 Get up to speed quickly with generative AI AI tools like ChatGPT and Gemini automated coding tools like Cursor and Copilot and countless LLM powered agents have become a part of daily life They ve also spawned a storm of misinformation hype and doomsaying that makes it tough to understand exactly what Generative AI actually is and what it can really do *Introduction to Generative AI Second Edition* delivers a clearly written survey of generative AI fundamentals along with the techniques and strategies you need to use AI safely and effectively In this easy to read introduction you ll learn How large language models LLMs work How to apply AI across personal and professional work The social legal and policy landscape around generative AI Emerging trends like reasoning models and vibe coding *Introduction to Generative AI Second Edition* guides you from your first eye opening interaction with tools like ChatGPT to how AI tools can transform your personal and professional life safely and responsibly This second edition has been completely revised to reflect the latest developments in the field from the latest innovations in prompt engineering and AI agents to fresh coverage of multimodal training reasoning models no code tools retrieval augmented generation RAG and more About the book *Introduction to Generative AI Second Edition* is an up to date guide to the capabilities risks and limitations of tools like ChatGPT Gemini and Claude This easy to follow guide moves quickly through the basics giving you the skills and understanding to use AI with confidence Along the way you ll explore how AI is impacting even established industries with an expert level look at global

investment in AI AI education policy AI s economic impact and the ongoing legal and ethical issues of AI usage About the reader For anyone interested in generative AI No technical experience required About the author Numa Dhamani is a natural language processing expert working at the intersection of technology and society Maggie Engler is an engineer and researcher currently working on safety for large language models [Build AI-Enhanced Web Apps](#) Theo Despoudis,2026-03-17 This book shows you step by step and example by example how to build sites and applications that take advantage of large language models LLMs like GPT Claude and Llama Written especially for web developers comfortable with React or Next js this book introduces the tools and techniques you need to add sophisticated AI features like Retrieval Augmented Generation RAG document summarization chatbots and more to your web based projects It guides you through AI development using only JavaScript and other common web dev skills no Python or Machine Learning experience required You ll learn by working with full scale AI projects that solve actual business problems You ll soon be delivering user friendly efficient interfaces that make the absolute best use of AI tech In Build AI Enhanced Web Apps you ll learn how to Integrate AI models into React and Next js applications Implement streaming responses and real time AI interactions Manage conversation history and context in chat applications Implement LangChain js for complex AI workflows and reasoning Build a web application for summarizing documents using LangChain js Utilize Retrieval Augmented Generation RAG systems for knowledge management Develop an AI powered interview preparation system with voice feedback About the technology The users have spoken Agents personalized responses and other LLM powered features are required in modern web applications Build AI Enhanced Web Apps presents the end to end architecture of AI web apps including UI backend infrastructure data processing API integration deployment and scaling with examples and language perfect for professional web developers About the book This accessible book shows you how to ship real AI features not just toy demos using a JavaScript stack you already know React for UI Next js for backend integration and the Vercel AI SDK to connect to LLMs like Gemini and GPT In it you ll acquire the skills you need to complete two portfolio ready projects a voice based interview assistant and a RAG powered corporate knowledge system You ll also learn how to design workflows that balance latency cost and UX and implement responsible guardrails for security quality control hallucinations and bias What s inside Build AI features using a professional stack Ship production ready features Learn from concrete projects About the reader For web developers familiar with JavaScript and React About the author Theo Despoudis is a Senior Engineer at WP Engine specializing in AI powered search and headless WordPress He is an expert in integrating LLMs RAG and Vercel AI SDK into React and Next js apps
