Experimental Test Results of a Generalized-parameter Fuel Control Peter G. Batterton,Harold Gold,1973 Considerable interest has been generated recently in low cost jet propulsion systems One of the more complicated components of jet engines is the fuel control Results of an effort to develop a simpler hydromechanical fuel control are presented This prototype fuel control was installed on a J85 GE 13 jet engine Results show that the fuel control provided satisfactory engine performance at sea level static conditions over its normal nonafterburning operating range including startup Results of both bench and engine tests are presented the difficulties encountered are described

Poppet Valve Control of Throat Stability Bypass to Increase Stable Airflow Range of a Mach 2.5. Inlet with 60 Percent Internal Contraction Glenn A. Mitchell,Bobby W. Sanders,1975 The throat of a Mach 2.5 inlet with a coldpipe termination was fitted with a stability bypass system System variations included several stability bypass entrance configurations Poppet valves controlled the bypass airflow The inlet stable airflow range achieved with each configuration was determined for both steady state conditions and internal pulse transients Results are compared with those obtained without a stability bypass system Transient results were also obtained for the inlet with a choke point at the diffuser exit and for the inlet with large and small stability bypass plenum volumes Poppet valves at the stability bypass exit provided the inlet with a stable airflow range of 20 percent or greater at all static and transient conditions
