The Law Times ,1913 **Sex and Self-Ownership** Jesse Wall,2025-06-21 Since the criminal law acquits a person who mistakenly believed that another person consented to the sex that they forced upon them rape is not prohibited it is regulated to borrow Mackinnon s phrase This book is concerned with the legal category of the exculpatory mistaken belief in consent why this category ought to be narrowed and how it can be narrowed without departing from criminal law s retributive morality and principles of criminalisation The book calls for three reforms of the criminal law First sex itself should be a pro tanto wrong where consent can justify the wrong or a mistaken belief in consent can excuse the wrong Second consent ought to be defined in terms of the objective words and overt actions that express a subjective attitude Third whether the defendant had an exculpatory mistaken belief ought to be determined solely by having regard to the steps the defendant had taken to ascertain whether the complainant consented These calls are predicated on a range of philosophical inquiries including explanations of how all sex instrumentalizes and objectifies another person how consent performs of trilogy of functions by representing a choice expressing a person s interests and by empowering a person to change their normative relationship with another person how a person can be blameworthy for acting against moral reasons even when they were unaware those reasons applied to their moral situation and how we can have a justified belief in the mental state of another person

Handbook of Musical Identities Raymond MacDonald, David J. Hargreaves, Dorothy Miell, 2017-03-09 Music is a tremendously powerful channel through which people develop their personal and social identities Music is used to communicate emotions thoughts political statements social relationships and physical expressions But just as language can mediate the construction and negotiation of developing identities so music can also be a means of communication through which aspects of people s identities are constructed Music can have a profound influence on our developing sense of identity our values and our beliefs be it from rock music classical music or jazz Musical identities MacDonald Hargreaves and Miell 2002 was unique in being one of the first books to explore this fascinating topic This new book documents the remarkable expansion and growth in the study of musical identities since the publication of the earlier work The editors identify three main features of current psychological approaches to musical identities which concern their definition development and the identification of individual differences as well as four main real life contexts in which musical identities have been investigated namely in music and musical institutions specific geographical communities education and in health and well being This conceptual framework provides the rationale for the structure of the Handbook The book is divided into seven main sections The first Sociological discursive and narrative approaches includes several general theoretical accounts of musical identities from this perspective as well as some more specific investigations The second and third main sections deal in depth with two of the three psychological topics described above namely the development of and individual differences in musical identities The fourth fifth and sixth main sections pursue three of the real life contexts identified above namely Musical institutions and practitioners Education and Health and well being The seventh and final main section of the Handbook Case studies includes chapters which look at particular musical identities in specific times places or contexts The multidisciplinary range and breadth of the Handbook s contents reflect the rapid changes that are taking place in music in digital technology and in their role in society as a whole such that the study of musical identity is likely to proliferate even further in the future
