attention from researchers to the theoretical advances and technological innovation in the construction of transportation facilities. It will be an invaluable asset for the development of transport infrastructure construction technologies worldwide. Among the landmark engineering projects in the initiative are the Piraeus Port in Greece, the 100 MW photovoltaic power plant in Hungary, Kauposberg and the Monnet Railway in Kenya, each of which stands out with its innovative highlights in theoretical research and technological advances. The book is expected to share with global experts and engineers in the field of transportation advanced research results and technologies in construction from China, discuss new research topics and explore feasible solutions in the realm of transportation engineering. The main topics discussed in this book include a New theories and technologies for the construction of roads, railroads, subways, airports, bridges, tunnels, and other infrastructure; b Advanced theories and technologies for the construction of ports, dams, reservoirs, sluices, hydraulic tunnels, canals, and other infrastructure; c Novel materials and innovative application of these materials to the construction of transportation facilities. This book is intended for graduate and doctoral students, experts, and engineers in the field of transportation engineering.

Proceedings of CIRMARE 2023 João Carlos Gonçalves Lanzinha, Eduardo Linhares Qualharini, 2023-12-04. This book highlights the latest advances, innovations, and applications in the field of resilience and adaptation of buildings and cities to climate change as presented by international researchers at the VI International Conference on Recovery, Maintenance, and Rehabilitation of Buildings (CIRMARE 2023) held in Covilhã, Portugal, on December 5-7, 2023. It covers a diverse range of topics such as accessibility of buildings and urban spaces, industrialization of rehabilitation processes, interventions in cultural heritage, building quality assessment, maintenance, and requalification of built spaces, BIM and the digitization of construction, urban planning, circular economy in the construction sector, urban infrastructure, rehabilitation, near-zero energy buildings, urban resilience, and climate change recovery of degraded urban areas, service life, and pathologies in buildings. The contributions, which were selected by means of a rigorous international peer review process, present a wealth of exciting ideas that will open novel research directions and foster multidisciplinary collaboration among different specialists. **Managing and Visualizing Your BIM Data** Ernesto Pellegrino, Manuel Andre Bottiglieri, Gavin Crump, Luisa Cypriano Pieper, Dounia Touil, 2021-11-25. Learn how to make optimum use of your BIM data using Dynamo to make better design decisions and create feature-rich dashboards using Power BI to track your model's data. Key Features: A go-to guide for AEC professionals to analyze and manage their data. Explore popular use cases and best practices from experts around the world. Create efficient dashboards using Dynamo and Power BI. Book Description: Business intelligence software has rapidly spread its roots in the AEC industry during the last few years. This has happened due to the presence of rich digital data in BIM models whose datasets can be gathered, organized, and visualized through software such as Autodesk Dynamo, BIM, and Power BI. **Managing and Visualizing Your BIM Data** helps you understand and implement computer science fundamentals to better absorb the process of creating Dynamo scripts and visualizing the collected data on powerful dashboards. This book provides a hands-on

approach and associated methodologies that will have you productive and up and running in no time After understanding the theoretical aspects of computer science and related topics you will focus on Autodesk Dynamo to develop scripts to manage data Later the book demonstrates four case studies from AEC experts across the world In this section you ll learn how to get started with Autodesk Dynamo to gather data from a Revit model and create a simple C plugin for Revit to stream data on Power BI directly As you progress you ll explore how to create dynamic Power BI dashboards using Revit floor plans and make a Power BI dashboard to track model issues By the end of this book you ll have learned how to develop a script to gather a model s data and visualize datasets in Power BI easily What you will learn Understand why businesses across the world are moving toward data driven models Build a data bridge between BIM models and web based dashboards Get to grips with Autodesk Dynamo with the help of multiple step by step exercises Focus on data gathering workflows with Dynamo Connect Power BI to different datasets Get hands on experience in data management analysis and visualization techniques with guidance from experts across the world Who this book is for This book is for BIM managers BIM coordinators design technology managers and all AEC professionals who want to learn Autodesk Dynamo to analyze manage and visualize their BIM data as well as understand some associated computer science topics You need to have a background in BIM and knowledge of what a BIM model is to make the most of this book
