Leveraging Today's Social Media Mark D. Benigni, Barbara A. Haeffner, Susan O. Moore, Jeffrey F. Solan, 2025-12-11 Explore how schools can leverage social media to enhance student learning from showcasing student work and facilitating college connections to improving communication with families and fostering community engagement **Ubuntu 24.04 LTS Server** Richard Petersen, 2025-03-07 This book is designed as an Ubuntu 24.04 LTS Server administration and reference source covering the Ubuntu servers and their support applications. Server tools are covered as well as the underlying configuration files and system implementations. The emphasis is on what administrators will need to know to perform key server support and management tasks. Coverage of the systemd service management system is integrated into the book. Topics covered include software management, systemd service management, systemd networkd, Netplan network configuration, and Ubuntu cloud services. Key servers are examined including Web, FTP, CUPS, printing, NFS, and Samba. Windows shares, Network support servers, and applications covered include the Squid proxy server, the Domain Name System (BIND) server, DHCP, distributed network file systems, nftables, firewalls, and cloud computing. The book is organized into five parts: getting started, services, shared resources, network support, and shells. Part 1 focuses on basic tasks such as installing the Ubuntu Live Server, configuring networking with Netplan, systemd networkd, and NetworkManager, managing software from the Ubuntu Snap and APT repositories, and basic usage for the desktop and the command line interfaces. Part 2 examines Internet servers as well as how services are managed by systemd using unit files. Configuration and implementation of the Postfix mail server, the vsftpd FTP server, the Apache Web server, as well as news and database servers are covered in detail. Part 3 deals with servers that provide shared resources on a local network or the Internet. Services examined include the CUPS printing server, NFS Linux network file server, and Samba Windows file and printing server, clustering, and cloud computing services supported by Ubuntu. Part 4 covers servers that provide network support like the Squid proxy server, the Bind Domain Name System (DNS) server, DHCP servers, and the nftables firewall along with the configuration firewall tools FirewallD and UFW. IPTables is included for reference. Key networking operations are also examined like IPv6 auto configuration, TPC/IP networking, and network monitoring tools. Part 5 provides a review of shell commands including those used for managing files, as well as shell scripts, variables, and configuration files. Be advised that for the servers there are very few changes from Ubuntu 22.04, but many changes for the desktop. **Exploring Management** John R. Schermerhorn, Jr., Daniel G.
