Leading Lean by Living Lean Philip Holt,2022-07-26 In Leading Lean by Living Lean Philip Holt details and explains what

is probably the most important part of becoming a Lean Leader living and practicing what you preach To do this you must believe in what you re doing understand what it means and what you need to do and do it every day The author through his engineering background has fully embraced the Plan Do Check Act PDCA model of Deming Shewhart but has adapted David Bovis Believe Think Feel Act BTFA model to understand why logic and facts are very often not the principal players in the game of change In this book Holt author describes how you can take both the PDCA and BTFA models into account and has sectioned the book into three prime parts 1 Head How you learn and understand the Lean principles and their application 2 Hands How you practice Lean Leadership daily 3 Heart How you internalize and believe in Lean Leadership Through this book you the Lean practitioner whether aspiring or experienced will have everything that you need to lead it do it and live it The nature of this book is more why to than how to the author knows that he cannot tell you how to lead do or live Lean he can only explain why it is so important and share his knowledge experiences failures and successes This book isn t so much a self help book as a self reflection book and it can point you in the proper direction but the book won t change you only you can change you Essentially with this book the author wants those who think of Lean as a toolkit who believe that Lean can be project managed or who argue about Lean versus Six Sigma and misunderstand the fundamental depth of impact that true Lean Leadership has on an organization to be disabused of any or all of those notions This book is aimed at those leaders who seek to experience the full transformative effects of Lean in their organizations and want to practice it at the principle level of deployment Holt s aim is to help business leaders enhance who they are by changing what they do and the way that they do it

Operational Excellence in Your Organization Fraser Wilkinson, Herve Duval, 2024-06-28 Organizations are under continued pressure to improve and innovate products and services to remain relevant and sustainable In many cases some form of transformation program is conceived to help achieve this aim The transformation itself may include the deployment of systems and processes that make the organization more capable of sustaining improvements and driving future change Change Agents often act as coaches trainers mentors and facilitators to embed change In practice these Change Agents must deal with resistance throughout different levels of the organization These Change Agents must be able to act as flexible multi situational problem solvers and teachers of those problem solving skills Only organizations that have developed a strong problem solving capability can hope to survive for sustained periods of time This book describes many of the obstacles that Change Agents must overcome and the knowledge they need to make them credible with both leaders and the workforce they are tasked with navigating through an organizational transformation Technical subjects such as diagnostic and improvement tools are described as well as pointing the reader in the direction of relevant theory and practical advice from the authors who have collectively more than 45 years of experience in such roles Subject matter expertise in Lean Operations Theory of Constraints Six Sigma Change Management Excellence Models Daily Management and Problem Solving is used to describe some essential frameworks that can be brought together in a powerful system of improvement to aid organizations but most

importantly to support and encourage the Change Agent wherever they are in their career At some point leaders and managers will also be expected to act as Change Agents This work brings together simple universal accessible and practical resources to help guide those front line Change Agents regardless of particular industry or experience **Lean Higher Education** William K.
