**Engineering Mathematics for Marine Applications** Umesh A. Korde, R. Cengiz Ertekin, 2023-05-25 Gaining expertise in marine floating systems typically requires access to multiple resources to obtain the knowledge required but this book fills the long felt need for a single cohesive source that brings together the mathematical methods and dynamic analysis techniques required for a meaningful analysis primarily of large and small bodies in oceans You will be introduced to fundamentals such as vector calculus Fourier analysis and ordinary and partial differential equations Then you ll be taken through dimensional analysis of marine systems viscous and inviscid flow around structures surface waves and floating bodies in waves Real life applications are discussed and end of chapter problems help ensure full understanding Students and practicing engineers will find this an invaluable resource for developing problem solving and design skills in a challenging ocean environment through the use of engineering mathematics

**Mathematical and Statistical Applications in Food Engineering** Surajbhan Sevda, Anoop Singh, 2020-01-30 Written by experts from all over the world the book comprises the latest applications of mathematical and models in food engineering and fermentation It provides the fundamentals on statistical methods to solve standard problems associated with food engineering and fermentation technology Combining theory with a practical hands on approach this book covers key aspects of food engineering Presenting cuttingedge information the book is an essential reference on the fundamental concepts associated with food engineering
