Designing for Democracy Jennifer Forestal, 2022 How should we fix digital technologies to support democracy instead of undermining it In Designing for Democracy Jennifer Forestal argues that accurately evaluating the democratic potential of digital spaces means studying how the built environment a primary component of our modern public square structures our activity shapes our attitudes and supports the kinds of relationships and behaviors democracy requires While many scholars and practitioners are attentive to the role of design in shaping behavior they have yet to fully engage with the question of what structures are required to support democratic communities and how to build them Forestal closes this gap by providing a new theory of democratic space Drawing from a wide range of disciplines including architecture psychology and the history of political thought she argues that democratic spaces must be designed with three environmental characteristics boundaries durability and flexibility that taken together afford users the ability to engage in fundamental civic practices Through extended analyses of Facebook Twitter and Reddit Forestal shows precisely how well these digital platforms meet the criteria for democratic spaces or whether they do so at all The result is a more nuanced analysis of the democratic communities that form or fail to emerge in these spaces as well as more concrete suggestions for how to improve them In connecting the built environment digital technologies and democratic theory Designing for Democracy provides blueprints for democracy in a digital age

Melanson,1989-02-17 Murkin was the code name chosen by the FBI for their investigation into the assassination of Dr Martin Luther King Jr in 1968 Today 20 years after the fatal shooting of the civil rights leader Philip H Melanson a renowned authority on American political assassinations unveils his own investigation into the murder Melanson has done an exhaustively thorough job on the still mysterious King assassination After following Melanson s meticulous pursuit of seemingly every lead in the case including interviews with the men whose names were used as aliases for alleged killer James Earl Ray there can be little doubt in the reader s mind that neither of the two official versions of what happened could have been the whole truth The first was the ever popular notion of the lone killer Ray The second propounded by a clearly inept congressional investigation a decade after the 1969 shooting was that an ill defined racist conspiracy was behind the assassination What seems unarguable is that Ray a petty criminal could not have killed King unaided There are too many improbabilities the source of his carefully chosen Canadian aliases the identity of the fat man who brought him a letter in Toronto during his escape the odd setup at the rooming house from which the shot was fired It is Melanson s thesis that there was high level intelligence involvement probably by the CIA which was violently alarmed by King s anti Vietnam stance
