SOLVED EXERCISES

S1. (a) For Rowena, Up strictly dominates Down, so Down may be eliminated. For Colin, Right strictly dominates Left, so Left may be eliminated. These actions leave the pure-strategy Nash equilibrium (Up, Right).

(b) Down is dominant for Rowena and Left is dominant for Colin. Equilibrium: (Down, Left) with payoffs of (6, 5).

(c) There are no dominated strategies for Rowena. For Colin, Left dominates Middle and Right. Thus, these two strategies may be eliminated, leaving only Left. With only Left remaining, for Rowena, Straight dominates both Up and Down, so they are eliminated, making the pure-strategy Nash equilibrium (Straight, Left).

(d) Beginning with Rowena, Straight dominates Down, so Down is eliminated. Then for Colin, Middle dominates both Right and Left, so both are eliminated, leaving only Middle. Because Straight and Up both give a payoff of 1, neither may be eliminated for Rowena, so there are two pure-strategy Nash equilibria: (Up, Middle) and (Straight, Middle).

S2. (a) Zero-sum game (payoffs in all cells sum to 4).

(b) Non-zero-sum.

(c) Zero-sum or (payoffs in all cells sum to 6).

(d) Zero-sum or (payoffs in all cells sum to 7).

Games, Gambling, and Probability David G. Taylor, 2021-06-22 Many experiments have shown the human brain generally has very serious problems dealing with probability and chance A greater understanding of probability can help develop the intuition necessary to approach risk with the ability to make more informed and better decisions The first four chapters offer the standard content for an introductory probability course albeit presented in a much different way and order The chapters afterward include some discussion of different games different ideas that relate to the law of large numbers and many more mathematical topics not typically seen in such a book The use of games is meant to make the book and course feel like fun Since many of the early games discussed are casino games the study of those games along with an understanding of the material in later chapters should remind you that gambling is a bad idea you should think of placing bets in a casino as paying for entertainment Winning can obviously be a fun reward but should not ever be expected Changes for the Second Edition New chapter on Game Theory New chapter on Sports Mathematics The chapter on Blackjack which was Chapter 4 in the first edition appears later in the book Reorganization has been done to improve the flow of topics and learning New
