method for SVTrNN based multi-attribute decision making with partially known or completely unknown weight information

Bibhas C. Giri, Mahatab Uddin Molla, Pranab Biswas, Single valued trapezoidal neutrosophic number SVTrNN

an extension of single valued neutrosophic set effectively deals with indeterminate and incomplete information in multi attribute decision making MADM problem In this paper we extend the grey relational analysis GRA method for solving SVTrNN based MADM problem where the weight information of attributes is partially known or completely unknown

Following the classical GRA method we define grey relational co efficient using a new distance measure We develop two optimization models to determine the weights of the attributes We calculate grey positive and negative relational degrees and define the relative closeness co efficient of each alternative to determine the best alternative
