Collaborative and Distributed Chemical Engineering. From Understanding to Substantial Design Process Support Manfred Nagl, Wolfgang Marquardt, 2008-07-23 IMPROVE stands for Information Technology Support for Collaborative and Distributed Design Processes in Chemical Engineering and is a large joint project of research institutions at RWTH Aachen University This volume summarizes the results after 9 years of cooperative research work The focus of IMPROVE is on understanding formalizing evaluating and consequently improving design processes in chemical engineering In particular IMPROVE focuses on conceptual design and basic engineering where the fundamental decisions concerning the design or redesign of a chemical plant are undertaken Design processes are analyzed and evaluated in collaboration with industrial partners

Optimization of Process Flowsheets through Metaheuristic Techniques José María Ponce-Ortega, Luis Germán Hernández-Pérez, 2018-07-19 This textbook presents a general multi objective optimization framework for optimizing chemical processes by implementing a link between process simulators and metaheuristic techniques The proposed approach is general and shows how to implement links between different process simulators such as Aspen Plus HYSIS Super Pro Designer linked to a variety of metaheuristic techniques implemented in Matlab Excel C and others eliminating the numerical complications through the optimization process Furthermore the proposed framework allows the use of thermodynamic design and constitutive equations implemented in the process simulator to implement any process Aimed at graduate and undergraduate students it presents introductory chapters for process simulators and metaheuristic optimization techniques and provides several worked exercises as well as proposed exercises In addition accompanying tutorial videos clearly explaining the implemented methodologies are available online Also some Matlab routines are included as electronic supporting material

Instrument Engineers' Handbook, Volume Two Bela G. Liptak, 2018-10-08 The latest update to Bela Liptak's acclaimed bible of instrument engineering is now available Retaining the format that made the previous editions bestsellers in their own right the fourth edition of Process Control and Optimization continues the tradition of providing quick and easy access to highly practical information The authors are practicing engineers not theoretical people from academia and their from the trenches advice has been repeatedly tested in real life applications Expanded coverage includes descriptions of overseas manufacturer's products and concepts model based optimization in control theory new major inventions and innovations in control valves and a full chapter devoted to safety With more than 2000 graphs figures and tables this all inclusive encyclopedic volume replaces an entire library with one authoritative reference The fourth edition brings the content of the previous editions completely up to date incorporates the developments of the last decade and broadens the horizons of the work from an American to a global perspective Bela G. Liptak speaks on Post Oil Energy Technology on the AT T Tech Channel

Scale-Up Processes Jamal Chaouki, Rahmat Sotudeh-Gharebagh, 2021-09-20 Common scale up methods are conventional where the blind piloting is essential This

imposes huge investment and leads to failures mostly in solid processing However the limitations of resources current shortcomings short time to market demand are forced companies to minimize piloting With these situations in mind current digitalization outlook and computational facilities we proposed and developed a novel iterative scale up method with case studies which highly expedites the process innovation through the following key sequences
