## **2 The Last Invention The Impact Of Advanced Ai** Francisco Jerbesson De Freitas

Morais,2026-01-15 The Last Invention The Impact of Advanced Artificial Intelligence Humanity has always moved forward by creating tools But for the first time it has created something capable of thinking learning and deciding In The Last Invention readers are taken on a deep clear and forward looking exploration of the rise of advanced artificial intelligence and its irreversible consequences for civilization The book examines how AI has evolved from a simple technological tool into a global cognitive infrastructure transforming education labor economics governments art science and even the human mind itself With accessible language and strong technical rigor the work explores the historical evolution of artificial intelligence how neural networks and large language models truly function the rise of multimodal generative AI the direct impact of AI on the global economy professions and geopolitical power and the ethical social and human limits of this transformation Moving beyond both technological hype and dystopian fear the book presents a central argument the greatest risk of AI is not the machine itself but how humanity chooses to use it By addressing themes such as expanded cognition digital exclusion inclusive interfaces augmented humans and mental sovereignty the book reveals that AI can become either the greatest instrument of inclusion ever created or the most sophisticated mechanism of inequality in human history The Last Invention is

## **Robin Hood Math**

Noah Giansiracusa,2025-08-05 How the rich and powerful use math to exploit you and what you can do to beat them at their own game Everything we do today is recorded as data that is sold to the highest bidder Plugging our personal data into impersonal algorithms has made government agencies more efficient and tech companies more profitable But all this comes at a price It is easy to feel like an insignificant number in a world of number crunchers who care more about their bottom line than your humanity It is time to flip the equation turning math into an empowering tool for the rest of us Award winning mathematician Noah Giansiracusa explains how the tech giants and financial institutions use formulas to get ahead and how anyone can use these same formulas in their everyday life You will learn how to handle risk rationally make better investments take control of your social media and reclaim agency over the decisions you make each day In a society that all too often takes from the poor and gives to the rich math can be a vital democratizing force Robin Hood Math helps you to think for yourself act in your own best interests and thrive

## Mitigating Bias in Machine Learning

Carlotta A. Berry,Brandeis Hill Marshall,2024-10-18 This practical guide shows step by step how to use machine learning to carry out actionable decisions that do not discriminate based on numerous human factors including ethnicity and gender The authors examine the many kinds of bias that occur in the field today and provide mitigation strategies that are ready to

deploy across a wide range of technologies applications and industries Edited by engineering and computing experts  
Mitigating Bias in Machine Learning includes contributions from recognized scholars and professionals working across  
different artificial intelligence sectors Each chapter addresses a different topic and real world case studies are featured  
throughout that highlight discriminatory machine learning practices and clearly show how they were reduced Mitigating Bias

Community Engagement for Machine Learning **The Sacred Chain** Jim Stump,2024-04-02 In this marvelously accessible  
book philosopher Christian Jim Stump provides the reader with new eyes for a journey through time the origin of the soul  
suffering and morality and reveals how the latest scientific findings about what it means to be human have led him to a  
deeper and more authentic faith Francis S Collins Director of the Human Genome Project and Founder of BioLogos author of  
The Language of God A thought provoking and eye opening work by Jim Stump Vice President at BioLogos and host of the  
Language of God podcast offering a compelling argument about how evolution does not have to be at odds with faith but can  
actually enrich and deepen it In this moving and deeply thoughtful book Jim Stump takes readers with him on his journey to  
understanding evolution and reconciling it with his faith The Sacred Chain draws on philosophy theology and the latest  
scientific research to tackle some of the biggest questions facing humanity and people of faith today such as How can we  
hold the Bible as a sacred text and yet reconcile modern science with it By condensing noteworthy events in the history of  
our universe into one calendar week what can we learn about God s creative process and priorities and where humans fit in If  
humans are created in the image of God what does evolution have to teach us about our species and our place in creation  
What about the soul How can we understand our transcendent qualities if the human body is the product of evolution How  
does evolutionary science help us understand how God might use pain and suffering for important and good purposes Does it  
have to be one or the other science or religion or is there a third way one that not only preserves faith in the face of modern  
science but leads to a stronger more relevant and more authentic faith Deeply researched and a delight to read The Sacred  
Chain provides clarity in our uncertain times revealing a bigger picture of our world and our place within it It is a panorama  
consistent with the scientific findings about who we are and where we come from that can actually bolster our faith as it  
engages our curiosity about ourselves our universe and the nature of existence itself **Rise of Generative AI and
