both advertisement methods its bidding allocation processes differences as well as its ad and disadvantages are explored Furthermore the significance of data collection opportunity for CTV ads and problems that might arise with it are discussed addition ally to opportunities and risks that could emerge with this new shift to CTV ads before finally ending in the research question Can TTD revolutionize CTV advertising through neuromarketing and establish itself as the leading software platform for CTV platforms by displaying highly personalized ads to each unique user Even though the current CTV advertising already provides promising metrics to measure the success rate of the respective advertisements ads are only distributed to the according series and movies rather to the user him herself Thus if TTD would establish a solution to be able to show specific ads to specific users the value both quantitative ROI and qualitative visiting the website shopping the product will increase significantly
