on the CPU Especially when using virtual desktops i e desktops that are provided in the data center the lack of GPU is often a
clear disadvantage compared to classic PCs In addition the load on the corresponding servers is getting significantly higher
and the number of users per physical server decreases The costs per user increase The industry recognized this disadvantage
several years ago and introduced the GPU Pass through technology A physical graphics card is assigned to a virtual machine
This can then use the full power of the graphics card but each virtual machine requires its own graphics card The costs per
