Andersen, 2002-12-12 A multi disciplinary team of authors analyze the economics of Brazilian deforestation using a large data set of ecological and economic variables They survey the most up to date work in this field and present their own dynamic and spatial econometric analysis based on municipality level panel data spanning the entire Brazilian Amazon from 1970 to 1996 By observing the dynamics of land use change over such a long period the team is able to provide quantitative estimates of the long run economic costs and benefits

of both land clearing and government policies such as road building The authors find that some government policies such as road paving in already highly settled areas are beneficial both for economic development and for the preservation of forest while other policies such as the construction of unpaved roads through virgin areas stimulate wasteful land uses to the detriment of both economic growth and forest cover *South America* Harold Wellman Fairbanks,1927 **Advanced Geography ...** Alex Everett Frye,1901 **Physical Geography** Arnold Guyot,1873 **Unknown Amazon** Colin McEwan,Cristiana Barreto,Eduardo Neves,2001 Unknown Amazon offers a bold new approach towards understanding the antiquity and complexity of tropical forest civilisation in the Amazon Basin It opens new perspectives on Amazonian Indian societies both past and present **The Journal of Geography** ,1917 *Annual Report of the Public Schools of the City of Macon and Bibb County, Georgia* Macon (Ga.)
