Google Maps Hacks Rich Gibson, Schuyler Erle, 2006-01-17
Foreword by Jens Lars Rasmussen Google Maps Tech Leads

Beginning Google Maps Mashups with Mapplets, KML, and GeoRSS Sterling Udell, 2008-11-21 Beginning Google Maps Mashups with Mapplets KML and GeoRSS is a beginner's guide to creating web mashups using Google mapping technology Serves as a single source primer to displaying data on Google Maps Covers both Mapplets and the Google Maps API Provides everything you need to start participating in the geographic Web What you'll learn Mash up GeoWeb services onto a Google map Package your mashup as a mapplet and publish it to maps.google.com Enhance your map with driving directions local search map advertising and more Discover common Google mapping mistakes to avoid Find out how and when to geocode existing data into mappable coordinates Deliver your own data as GeoXML Who this book is for This book is for web designers and developers who have not worked with Google Maps or geographic data before A working knowledge of HTML is required and some programming experience is beneficial

Introducing Human Geographies Paul Cloke, Philip Crang, Mark Goodwin, 2013-12-05 Introducing Human Geographies is the leading guide to human geography for undergraduate students explaining new thinking on essential topics and discussing exciting developments in the field This new edition has been thoroughly revised and updated and

coverage is extended with new sections devoted to biogeographies cartographies mobilities non representational geographies population geographies public geographies and securities Presented in three parts with 60 contributions written by expert international researchers this text addresses the central ideas through which human geographers understand and shape their subject Part I Foundations engages students with key ideas that define human geography s subject matter and approaches through critical analyses of dualisms such as local global society space and human nonhuman Part II Themes explores human geography s main sub disciplines with sections devoted to biogeographies cartographies cultural geographies development geographies economic geographies environmental geographies historical geographies political geographies population geographies social geographies urban and rural geographies Finally Part III Horizons assesses the latest research in innovative areas from mobilities and securities to non representational geographies This comprehensive stimulating and cutting edge introduction to the field is richly illustrated throughout with full colour figures maps and photos These are available to download on the companion website located at www.routledge.com/9781444135350

Google and the Mission to Map Meaning and Make Money Bart Milner,2004 This book is the unfolding story of the new technology of Internet Search how Larry Page and Sergey Brin the founders of Google discovered a new way to index the Internet s network of networks by developing Search methods so powerful that they effectively created a free public and universal library out of billions of random documents It also tells how together with the help of a brilliant team built initially at Stanford University they then found a new way of making money through contextual advertising now worth e billion leaving potential competitors particularly Microsoft far behind It shows how Google s founders have also succeeded in insisting that integrity rather than profit remains at the heart of an enterprise that they will continue to control despite the best efforts of Wall Street The second half of this book also seeks to explain the central problems of machine intelligence the difference between words and their meaning or syntax and semantics which had blocked this kind of IT development for half a century until Google s founders discovered that hypertext the unique feature of the Internet that links documents could be measured and mapped to sort millions of apparently similar pages for relevance and significance Google s pursuit of a hugely ambitious and optimistic American dream that leaves them globally admired and respected keeping their principles intact whilst also creating a fabulously wealthy company is a winning blend of luck jokes mathematical inspiration engineering perspiration deep technical knowledge of the Internet and they would have you believe thousands of highly trained pigeons The book is 288 pages long including a comprehensive index and 600 item bibliography covering virtually all aspects of Internet Search The print version of the book comes with a free online electronic version with hypertext links to related articles and books designed to make any aspect of the history of Internet search easy to find with a couple of mouse clicks The book s author Bart Milner is a trained technology journalist and editor who started using the Web in 1984 with a 300 baud acoustic coupler and then became a developer partly to try and solve the question of why computer logic has been unable to deal with

meaning and association This background has given him an insight into the inspired but almost accidental way that Google's founders cracked the problem of finding a significant document from billions of unindexed and changing Web pages in a fraction of a second Anyone interested in the future of the Internet and Information Technology should enjoy this fast and fluid story of a company which has become a flagship business of the 21st century by not conceding any of its integrity and principles to the huge pressures of commercial profit whilst providing some of the most elegant and powerful engineering solutions ever seen on the Net
