**The AI Tsunami** Riz Thakur, 2026-02-27 India is standing at the edge of the biggest economic disruption in its history Three hundred million workers security guards farmers garment workers truck drivers construction labourers are about to be replaced Not slowly Fast The AI Tsunami is a warning Written in plain language for every working Indian this book walks through six sectors Security Agriculture Garments Logistics Construction and the Digital Access Gap showing exactly how automation will hit when it will hit and who gets hit first This is not a book about technology It is a book about people The guard at your gate The woman stitching your shirt The boy on the delivery bike Their jobs are the ones disappearing first Written by entrepreneur Riz Thakur who has witnessed every technology wave in India since 1995 together with Claude Anthropic s AI The first Indian book co written with AI warning about AI If you work in India If you employ people in India If you care about what happens next read this before 2028

*Rage and the Republic* Jonathan Turley, 2026-02-03 On the 250th anniversary of the Declaration of Independence law professor legal analyst and bestselling author of *The Indispensable Right* Jonathan Turley explores how the unique origins of American democracy set it apart from other revolutions whether it can survive and thrive in the 21st century and how the unfinished story of the revolution will play out in a rapidly changing world This is a book about revolutions Most countries are the progeny of revolution At the birth of this nation the Founding Fathers faced the quintessential question of self governance how do you keep democracy from devolving into violent anarchy or brutal despotism Drawing on little known facts from the founding Jonathan Turley reveals how the United States escaped the cycles of violence and instability that plagued other democratic movements from ancient Athens to 19th century France As the nation approaches a new era marked by artificial intelligence robotics and profound economic shifts America must again withstand the pressure of radical forces that seek to curtail our natural liberties under the guise of popular reform In this crisis of faith many politicians and pundits are questioning the very principles of American democracy and some law professors are even calling for scrapping the Constitution Synthesizing sources from history to philosophy to the arts Turley offers a hopeful account of how the lessons of the past can guide us through today s crisis of faith in democracy and see us into the future He notes From redcoats to robots our challenges have changed Yet we have remained Our greatest danger is not forgetting the history detailed in this book but forgetting who we were in that history

*Empire of AI* Karen Hao, 2025-05-20 A New York Times Notable Book Finalist for the National Book Critics Circle Award An Instant New York Times Bestseller Named a Best Book of the Year by Smithsonian Scientific American and Elle A bestselling page turner that has made waves not just in Silicon Valley but around the world With *Empire of AI* Hao is fundamentally shaping many people s perceptions and understanding of the company at the center of the AI revolution TIME Magazine TIME100 AI 2025 Excellent and deeply reported Tim Wu The New York Times Startling and intensely researched an essential account of how OpenAI and ChatGPT came to be and the catastrophic places they will likely take us Vulture From a brilliant longtime AI

insider with intimate access to the world of Sam Altman's OpenAI from the beginning an eye opening account of arguably the most fateful tech arms race in history reshaping the planet in real time from the cockpit of the company that is driving the frenzy When AI expert and investigative journalist Karen Hao first began covering OpenAI in 2019 she thought they were the good guys Founded as a nonprofit with safety enshrined as its core mission the organization was meant its leader Sam Altman told us to act as a check against more purely mercantile and potentially dangerous forces What could go wrong Over time Hao began to wrestle ever more deeply with that question Increasingly she realized that the core truth of this massively disruptive sector is that its vision of success requires an almost unprecedented amount of resources the compute power of high end chips and the processing capacity to create massive large language models the sheer volume of data that needs to be amassed at scale the humans cleaning up that data for sweatshop wages throughout the Global South and a truly alarming spike in the usage of energy and water underlying it all The truth is that we have entered a new and ominous age of empire only a small handful of globally scaled companies can even enter the field of play At the head of the pack with its ChatGPT breakthrough how would OpenAI resist such temptations Spoiler alert it didn't Armed with Microsoft's billions OpenAI is setting a breakneck pace chased by a small group of the most valuable companies in human history toward what end not even they can define All this time Hao has maintained her deep sourcing within the company and the industry and so she was in intimate contact with the story that shocked the entire tech industry Altman's sudden firing and triumphant return The behind the scenes story of what happened told here in full for the first time is revelatory of who the people controlling this technology really are But this isn't just the story of a single company however fascinating it is The forces pressing down on the people of OpenAI are deforming the judgment of everyone else too as such forces do Naked power finds the ideology to cloak itself no one thinks they're the bad guy But in the meantime as Hao shows through intrepid reporting on the ground around the world the enormous wheels of extraction grind on By drawing on the viewpoints of Silicon Valley engineers Kenyan data laborers and Chilean water activists Hao presents the fullest picture of AI and its impact we've seen to date alongside a trenchant analysis of where things are headed An astonishing eyewitness view from both up in the command capsule of the new economy and down where the real suffering happens Empire of AI pierces the veil of the industry defining our era
