

# Including Technical Competencies in Competency Models

1

## Conceptualizing Project

1. Identify target group and jobs
2. Determine the business need- why is model needed?
3. Develop approach for project- what must be done; e.g. data gathering sessions
4. Gain sponsor approval for approach

2

## Project Planning

1. Develop project plan and timeline
2. Working session with sponsor and key people to review plan and timeline
3. Identify people for resource team and those needed for data collection activities; e.g. for panels needed, who is on panels
4. Define roles and responsibilities for project team
5. Develop and launch communication plan

3

## Data Collection

1. If unfamiliar with target job(s), conduct Technical Job Requirements Interviews as needed
2. Conduct panel(s) with SMEs to:
  - a. Identify technical competencies for target jobs
  - b. Write definitions for each competency
  - c. Create behavioral criteria for the proficiency levels
3. Conduct panel(s) with department leaders to agree on the competencies needed for each job and the required proficiency levels

4

## Data Analysis and Coding

1. Integrate results from all panel sessions
2. Review data from leader interviews to ensure that the competencies they identified are reflected in model(s)
3. Use resource team for additional information needed or to fill in missing data

5

## Building the Models

1. Prepare draft of model(s) showing:
  - a. Competencies with definitions
  - b. Indicators for the proficiency levels for each competency
  - c. Chart showing competencies needed and required proficiency levels for each target job
2. Review with project team and sponsor; revise based upon feedback
3. Prepare version of model for communication and use in applications

6

## Develop Applications

1. Develop materials needed to support initial applications, e.g.:
  - a. Evaluation process and report to be used to conduct baseline evaluations on all incumbents
  - b. Suggested questions for use in selection interviews to focus on required competencies
2. Develop communications for model and new applications; schedule and conduct training needed
3. Develop implementation plan including success measures to be used

The Global Information Society Wendy Currie

The last few decades have witnessed profound changes in the structure culture management and technology of organisations

Just as information technology offers both opportunities and threats to organisations the Internet and its potential for electronic commerce poses fresh challenges

So far much hype surrounds the subject of electronic commerce and its possibilities for leveraging business advantage

Whilst governments on both sides of the Atlantic urge companies to invest in Internet technology and develop e business past lessons from IT investment have often been disappointing

Likewise the rapid growth of IT outsourcing in the 1980s and 1990s produced mixed results

Whereas some companies successfully reduced costs and improved their performance through outsourcing others were

permanently damaged as management failed to address important issues relating to the IT strategy and infrastructure The Global Information Society addresses the phenomenon of the global information society in the context of market technology management practice capabilities and skills and the role of government Designed for academics practitioners and students this book does not offer simple solutions to complex business problems Instead it critically evaluates models frameworks debates and observations relating to these five key themes within the global information society Personnel Management Abstracts ,2000 **Management and Labour Studies** ,1999 **South African journal of library and information science** ,1997
