Increasing global competition in a product oriented industry has required manufacturing enterprises to continuously improve product quality functionality and features as well as implementing a reduction in product cost and time to market The traditional approach to product development requires a substantial amount of time to evolve the product design from its initial configuration to the final product Since 70% or more of the total product cost is determined in the design stages significant potential savings can be achieved by improving traditional design practices Because of its effectiveness and great potential in product design concurrent engineering CE is attracting great interest from both industry and academia The

thirteen research papers in this volume provide a current overview on progress in concurrent engineering. Divided into two parts, Part I primarily focuses on methodology and applications of CE, while Part II dis
