Private Sector Development in an Emerging World Diederik Boer, Harald Sander, Katharina Friz, Antonella Anastasi, 2023-12-04 This book explores the interactions between private sector development public policies and societal institutions with a strong view on contributing to sustainable and inclusive development in emerging countries The private sector is often praised as an engine of economic growth This belief has led to significant efforts to promote private sector development in emerging countries Development agencies prioritize private sector development and national governments are following suit resulting in often huge incentives to stimulate and attract private investment However private sector development is not a panacea for sustainable and inclusive development as the past decades have clearly shown Economic growth societal development and environmental sustainability are often in a sharp conflict and more often than not economic growth has failed to improve the lives of all citizens This book examines the role the state and the private sector should play to benefit from the dynamics of business development while ensuring that these benefits are shared broadly without jeopardizing sustainability The views presented differ in detail but the analyses and case studies presented share common themes namely that the relative roles of state and private sector of should be balanced and that this particular balance should be based on the context of each country in order to make the private public sector interaction work for all people

Forestry Economics John E. Wagner, 2023-12-22 Forestry Economics introduces students and practitioners to the economics of managing forests and forest enterprises The book adopts the approach of managerial economics textbooks and applies this to the unique problems and production processes faced by managers of forests and forest enterprises What many future forest and natural resource managers need is to understand what economic information is and how to use it to make better business and management decisions John E Wagner draws on his 30 years of experience teaching and working in the field of forest resource economics to present students with an accessible understanding of the unique production processes and problems faced by forest and other natural resource managers The second edition has been updated to include Expanded discussion of compounding discounting and capital budgeting as well as an expanded discussion of when to replace a capital asset that has i costs but no direct revenue stream such as a machine ii costs and a direct annual revenue stream such as a solar array or iii costs and a periodic revenue stream illustrated by the forest rotation problem New practical examples to provide students with applications of the concepts being discussed in the text most notably on New Zealand and a Radiata Pine Pinus radiata Plantation A brand new chapter that develops business plans for for profit businesses to illustrate how a business plan is derived from the economic information contained within the Architectural Plan for Profit and how it can be used to make business decisions about continuing to operate a business or to start a new business This textbook is an invaluable source of clear and accessible information on forestry economics and management not only for economics students but also for students of other disciplines and those already working in forestry and natural resources **Creative**
