

## Sommerville Software Engineering 10th ed. Chapter 3 questions with correct answers

Common characteristics of Agile methods: The processes of specification, design and implementation are interleaved. **CORRECT ANSWER** There is no detailed system specification, and design documentation is minimized or generated automatically by the programming environment used to implement the system. The user requirements document is an outline definition

of the most important characteristics of the system

Common characteristics of Agile methods: The system is developed in a series of increments. **CORRECT ANSWER** End-users and other system stakeholders are involved in specifying and evaluating each increment. They may propose changes to the software and new requirements that should be

implemented in a later version of the system.

Common characteristics of Agile methods: Extensive tool support is used to support the development process. **CORRECT ANSWER** Tools that may be used include automated testing tools, tools to support configuration management, and system integration and tools to automate user interface production

Customer involvement **CORRECT ANSWER** Customers should be closely involved throughout the development process. Their role is provide and prioritize new system requirements and to evaluate

the iterations of the system.

Embrace Change **CORRECT ANSWER** Expect the system requirements to change, and so design the system to accommodate these changes.

Incremental Delivery **CORRECT ANSWER** The software is developed in increments, with the customer specifying the requirements to be included in each increment
