Challenging Modern Physics Al Kelly,2005 Newton s Laws held for 300 years until Einstein developed the special theory of relativity in 1905 Experiments done since then show anomalies in that theory This book starts with a description of the special theory of relativity It is shown that Einstein was not the first to derive the famous equation $E = mc^2$ which has become synonymous with his name Next experimental evidence that cannot be explained by special relativity is given In the light of this evidence the two basic postulates of the special theory of relativity on the behaviour of light are shown to be untenable A new theory universal relativity is developed which conforms to the experimental evidence The movement of a conductor near a pole of a magnet and the movement of that pole near the conductor does not always give the same result It has been claimed that this contradicts relativity theory Experiments described in this book show that it is not special relativity but another basic law of physics that is contradicted Faraday s Law The Big Bang theory of the beginning of the universe is questioned and an alternative proposed The source of much of the mysterious missing dark matter that has been sought for decades by astronomers is located An explanation of the shapes of some galaxies is proffered This book presents an alternative to Einstein s special theory of relativity solves many problems left unanswered by special relativity gives a better fit to many phenomena and experimental data and is more philosophically appealing It is recommended to all people interested in fundamental issues of physics and cosmology Professor Andre Assis Brazil The book treats its subject properly not just as an impersonal set of equations but rather as a developing saga full of human triumph and failure One learns from both experimental results and simple logical argument that all is not well with modern physics Dr Neal Graneau Oxford University U K Irish engineer solves the dark secrets of space Sunday Times U K Einstein got relativity theory wrong Bangkok Post Thailand **ANL.** U.S. Atomic Energy Commission,1963 *General Relativity and Cosmology* Tai L.
