Edwards, John Magee, 2001 The seventh edition of this classic considered by many to be the definitive text in the field describes how to apply the three basic principles of charting to interpret common charting patterns how to project when and how far prices will drop and how to get into or out of investments at the right time This updated and revised edition also includes recent charts of Internet and technology issues and new chapters for commodities traders detailing how to chart futures options and derivatives trading Annotation copyrighted by Book News Inc Portland OR Mind, Money & Markets Dave Harder, Janice Dorn M.D. Ph.D., 2014-10-10 After losing much of his money when the South Sea Bubble burst in 1720 English physicist and mathematician Isaac Newton stated I can calculate the motion of heavenly bodies but not the madness of people Even though Isaac Newton was a brilliant man he did not realize that markets function in a way that is opposite to almost everything else we do For example if people are lining up around the block to purchase an iPad it is a sign that it is a good product If people are lining up around the block to buy a condominium it is a bad sign for real estate Markets do not always act in a rational or

logical manner Mind Money Markets explains why they act the way they do It is critical for every person to understand this in order to make wise decisions ranging from buying a home to operating a business Expert advice is much less reliable than we expect it to be because no one can accurately predict the future on a consistent basis Gigantic losses like the 6.2 billion trading loss at JP Morgan in 2012 show that investors are not giving momentum following the trend the respect it deserves Mind Money Markets offers a momentum filter specifically a screening tool from which every individual and professional investor should benefit The book also provides a circuit breaker that enables investors to limit losses in case of an unexpected event in financial markets Using powerful and poignant analogies from their life experiences including Dave Harder's twelve years as a Search and Rescue volunteer we provide readers with a simple discipline to preserve precious hard earned capital during severe downturns and to outperform benchmarks when markets are in an uptrend It is easier to know what to do than to actually do it Psychiatrist Dr Janice Dorn specializes in helping traders and investors deal with emotions and aspects of human nature that hinder them from making astute investment decisions for stocks bonds real estate currencies or commodities We have passed on many words of wisdom collected from market sages and great thinkers We also highlight some major misconceptions about investing and show the reader how to overcome them and prosper With a compelling mixture of fascinating stories and more than 100 colored charts and photographs this is truly a unique work about how human beings react to markets The book helps individual as well as professional investors to be efficient with their time and energy by teaching them to focus only on a few factors which have the most significant impact on financial markets The personalized strategies provided in these pages will enable readers to maximize gains minimize losses and have more time to spend on things that matter the most in their lives
