A selection of monographs on successful practices** Martina Vránová,2023-05-23 As Languages for Specific Purposes have always been defined as student oriented the rationale behind this volume is to use the rather neglected niche of the other necessary agent of language instruction and thus focus on the LSP practitioner This turn towards the instructor has been motivated by the fact that a great number of LSP practitioners enter their jobs without previous expertise They lack LSP education or they may not even have a background in applied linguistics This motivation has proven valid as many of the volume s contributors have faced this particular situation in their professional lives For insights into the LSP field and guidelines on the best practices they must rely on their colleagues who offer to share their experience through workshops conferences or papers which is what this volume provides The primary goal of this volume is to present considerations of what challenges LSP practitioners face and should be prepared for in their jobs and to provide practice tested methodological guidelines on such demanding teaching techniques as blended and flipped learning or tandem

learning All papers have been written by LSP practitioners and researchers in higher education Thus this volume provides both guidance and self reflection In other words it is written by experienced LSP practitioners for aspiring LSP practitioners about how they see themselves and what effort they make to meet the challenges of their jobs As proof that LSP practice is a global challenge papers have been collected from many European countries the USA Uruguay Even though most papers are naturally concerned with English being the lingua franca of today the collection also features guidelines for teaching Spanish French and Dutch for specific purposes Moreover the target disciplines these languages are taught for encompass business engineering sociology or medicine thus supporting the assumption of the universal character of problems LSP practitioners deal with   **Reference Catalogue of Current Literature** ,1924   **Plain Language for Translators** Lynne Bowker,2026-03-11 Readers shouldn t need to struggle to understand documents Whether they are reading a form to request government services a contract for a mobile phone plan or a patient information leaflet for prescription medication people deserve to understand the documents that they read Social justice risk management and a desire to extend the reach of the message are driving the fast growing demand for plain language documents and translators are well placed to help meet this demand Written by an experienced translator and translation educator Plain Language for Translators responds to the need for an accessible introduction to the main issues involved in designing developing and evaluating plain language documents in communicative settings such as government legal health and science communication It details the benefits of providing plain language documents and explains how translators skills can be transferred to plain language writing This book provides practical guidance on implementing and evaluating the plain language principles of relevance findability understandability and usability as well as information about pertinent tools Closely related concepts such as document design inclusive language easy language and controlled language are also explored Each chapter includes key questions discussion topics activities and suggestions for further reading all designed to empower translators to develop the skills needed to work as plain language practitioners   **Popular Educator** ,1919   ECEL 2016 - Proceedings of the 15th European Conference on e- Learning , Proceedings of the 15th European Conference on e Learning ECEL 2016   Course of Study in English ...
